Subject: RE: HGY/2022/2723

Hi Valerie,

The submitted details satisfies my raised queries below:

- Net gain of proposed tree planting to what is removed (shown by any of the following- canopy net gain in hectares, number of trees felled and proposed number planted, CAVAT, or iTree)
- Planting tree species list showing good interest, diversity, and urban fitness. Specification and any planned impact trees
- An on board Arboriculturist to completion
- A five-year aftercare and replacement plan to establish independence in the landscape

The only outstanding query is:

- Given percentage for the encroachment into the RPAs of G01, T08, T011, T017 & T020

However, going over the report, I can see these are for mainly adjacent neighbouring trees. These are low quality category C, with only T020 Sycamore 14m H being slightly affected on site.

I am satisfied after reviewing again the measures to mitigate within the RPAs of these trees.

Regards,

Daniel Monk
