

Refuse and Recycling statement:

The existing arrangements for refuse and recyclable storage and collection would be maintained as the proposal will cater for the maximum capacity of 6 tenants, the existing property is large 5-bedroom property with possibility of up to 7 tenants. This would mean there should be no increase in refuse produced.

The waste and recycling is stored within the property and is taken out on the morning of collect and placed on the public highway for collection. This is the setup with all of the property's street facing on the road.

The storage facilities provided have sufficient storage space for waste and recycling materials to be stored for seven days.
