

TIMBERULOVE SIBERIAN LARCH

GRADE AND QUALITY DESCRIPTION

Timberulove Siberian Larch grading is familiar to well known grades around the world.

There are three main grades of our timber: PREMIUM Grade (unsorted 0 -I), A Grade as well known as Unsorted (I-III) and BC Grade known as Sawfalling IV.

- PREMIUM Grade (unsorted 0-I) is our best timber we can offer to our clients. Premium Grade timber gives first class outstanding finish, exceptional look and quality to project. Premium Grade (unsorted 0-I) timber is knot free and only tiny pin knots 1mm - 2mm allowed.
- A Grade - Unsorted (I-III) - timber has minimal knots and where there are knots present, they are usually smaller than in Sawfalling grade. Knots usually will be life-sound, no black knots aloud. The size of the knotts allowed up to 35mm across the face on the board, but where more knots were present, the size of the knots limited to 23mm.
- Our Sawfalling be (IV) timber normally has larger and more frequent knots. The size or the knotts allowed up to 35mm across the face on the board. Occasional knots with holes or little cracks are possible.
