| <b>Application number</b> | HGY/2023/0040                                                                                                                                                                                                                                   |
| <b>Application type</b>   | <b>Conservation Area Notification</b>                                                                                                                                                                                                           |
| <b>Site Address:</b>      | Hornsey Reservoir Tile Kiln Lane London N6 5LG                                                                                                                                                                                                  |
| <b>Proposal</b>           | <p>As per attached report.</p> <p>Felling of 7 x Ash trees, felling of 2 x small unknown species trees, logs to be left as habitat piles on site.</p> <p>Please note that these works are required to be completed prior to nesting season.</p> |

|                         |                     |                                            |
|-------------------------|---------------------|--------------------------------------------|
| <b>RECOMMENDATION:</b>  | <b>No Objection</b> |                                            |
| <b>Application date</b> | 06/01/2023          |                                            |
| <b>Tree Inspector</b>   | DM                  | <b>Date:</b> 1 <sup>st</sup> February 2023 |

## **Site**

The various trees, as shown within the report and plan, are situated mainly on the north and east boundaries of the property. They are publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works (01/02/2023 at approximately 11am).

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

## **Proposal**

Tree works proposed:  
As per attached report.

Felling of 7 x Ash trees, felling of 2 x small unknown species trees, logs to be left as habitat piles on site.

Please note that these works are required to be completed prior to nesting season.

## **Issues**

I hold no objections to the proposed works. The trees are low grade, would score low using a methodology to rate their worthiness for a Tree Preservation Order, and are causing direct damage to the high wall.

The location is secure.

The copse to the north has constant regeneration of vegetation and saps. Since there is no public access, the site is good for flora and fauna that require low disturbance.

## **Recommendation**

**No Objection**
