Proposed rear dormer window

The proposed rear dormer window would fall within the limits of permitted development subject to the following:

- For a terrace house as the host property, the volume allowance is 40 cubic metres. The volume proposed here is 28 cubic metres – therefore complies.
- No extension beyond the plane of the existing roof slope of the principal elevation that fronts highways – the proposed dormer is positioned to the rear roof slope and as such complies.
- No extension to be higher than highest part of the roof – the proposed dormer is set below the ridge of the existing roof – therefore complies.
- Materials to be similar in appearance to the existing house. You have to ensure that the cheeks of dormer is of a similar appearance to roof slates.
- No verandas, balconies or raised platform – complies.
- Side facing windows to be obscure-glazed; any opening to be 1.7m above the floor- no side facing window proposed and as such complies.
- Roof extensions not to be permitted development in designated area – not in a designated land, therefore complies.
- Roof extensions, a part of hip to gable ones, to be set back, as far as practicable, at least 20cm from the eaves. Proposal achieves 20cm from the eaves and as such complies.
