

PROTECTED TREE REPORT (TREE WORKS)

Haringey Council, L4, Alexandra House, Station Road, N22 7TY

Application number	HGY/2023/0358
Application type	Conservation Area Notification
Site Address:	72 Clarence Road Wood Green London N22 8PW
Proposal	FIVE DAY NOTICE My client at 72 Clarence Road, Wood Green, N22 8PW, has a Lime tree in her back garden which backs on to Finsbury Cottages. The tree is an existing pollard of approximately 8m, the main leader has severe decay, extending all the way down the stem and into the main crown break at approximately 3m. This main leader is in imminent danger of falling so needs to be removed. Due to the extent of the decay into the main crown break, we are planning to reduce the two remaining stems by approximately 2m below the current pollard points in order to maintain the tree as a low pollard for as long as possible. Please see photograph attached. Please accept this email as a 5 day notice to carry out this work.

RECOMMENDATION:	No Objection	
Application date	06/02/2023	
Tree Inspector	DM	Date: 6 th February 2023

Site

The Lime *Tilia* spp. tree, as shown in the photograph, is situated in the rear garden of the property. It is publicly visible from Finsbury Cottages.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Bowes Park Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:
FIVE DAY NOTICE

My client at 72 Clarence Road, Wood Green, N22 8PW, has a Lime tree in her back garden which backs on to Finsbury Cottages. The tree is an existing pollard of approximately 8m, the main leader has severe decay, extending all the way down the stem and into the main crown break at approximately 3m. This main leader is in imminent danger of falling so needs to be removed. Due to the extent of the decay into the main crown break, we are planning to reduce the two remaining stems by approximately 2m below the current pollard points in order to maintain the tree as a low pollard for as long as possible.

Please see photograph attached.

Please accept this email as a 5 day notice to carry out this work.

Issues

I hold no objections to the proposed works to abate and make the tree safe.

From the photograph it is evident decay is present. I have no reason to doubt the above findings.

Decay on pollarded Limes is common. Extensive column decay at the union is due to the entry point for pathogens.

Recommendation

No Objection
