Subject: RE: Planning Consultation - LB Haringey - HGY/2022/3534 - Building to the rear of 26 High Road, Wood Green, London, N22 6BX

Hi James,

I've had a look at this application - HGY/2022/3534 - Building to the rear of 26 High Road, Wood Green, London, N22 6BX and the waste information in the DAS.

As this is a change of business use there is limited impact on the waste/ recycling arrangements. The proposed storage area is the current site and commercial waste and recycling collections are tailored to meet the business needs and not necessarily undertaken by L B Haringey.

At this stage, it is not clear if the local authority collection services or a private contractor will be used to transport the waste so it would be helpful to see the details concerning this point as the proposal develops. As long as the waste contractor used is a licenced waste carrier and complies with the [waste duty of care code of practice](#), there is no impact on Haringey.

If there is any other information you need concerning this please let me know.

Kind regards

Ann
