

NOTES:

Levels shown have been interpolated from drawn information received from a third party and F3 Architects do not warrant the accuracy of that information. It is the responsibility of the Main Contractor to check all information contained within this drawing prior to work being carried out. Any discrepancies or ambiguities within this drawing, between it and the existing site, must be reported immediately to the Design Team before proceeding. The boundary redline shown is indicative

The information on this drawing is based on a third party measured survey.

It is assumed that all works on this drawing will be carried out by a competent contractor, working where appropriate to an approved method statement.

Except for Planning purposes, figured dimensions only are to be taken from this drawing.
All dimensions are in millimetres unless otherwise stated.
All dimensions shall be checked on site prior to works commencing.
Any discrepancies shall be reported to the Architect.

Warmington House was built on part of a previously developed site for the Trulove family in 1828.

Its name derives from James Warmington coal merchant and skin salesman who occupied the property from 1851-76.

Later occupants were William Henry Prestwich, photographer, and his son John Alfred Prestwich, manufacturer of cine cameras, who lived here from 1888-98 and went on to invent the JAP motorcycle petrol engine and to found the
JAP Engineering Company.

The house was a restaurant from 1911-23.

Restored as part of the Tottenham Experience in 2018.
