Who We Are

We are Collaborative Care Ltd. The New Way to progress.

We are specialists in providing person centred care and support for adults with learning disabilities who have personal care needs and wish to live independently. We don't make a support plan for each person until we've spent time getting to know them well. We can only create a strategy that **truly works** once we understand their history, condition, beliefs, wishes, and future goals through interactions with care providers, family, and, of course, the individual themselves

Our Ethos

We believe that every individual has the right to progress and maximise their potential. Every person is treated with respect and dignity, and is supported in every aspect of their lives.

Vision

We know just how important it is for our clients to have the right person alongside them, offering both full-time care and companionship at a vulnerable time. Our vision is to empower people with learning disabilities, mental health and other underlying health issues to live an independent and fully empowered life consistent with their goals and aspirations.

Personal Care

We understand how important it is to deliver personal care services with dignity and respect at all times by staff who are trained, who are compassionate and who put you first.

Mission

Our mission is to see people with disabilities live in their own home so that they are happier, have more freedom, independence, choice on their lifestyle and experience a life free of abuse and harm.

Companionship

Our staff will offer the professional care and support required for you to live in the community. We believe that in order to live well in your home and improve your well-being, you must be able to do activities of your choice. Our team of staff are equipped to support you so that you never feel you live alone and isolated.

Support workers

Staff employed by Collaborative Care Ltd understand that they must give the best care and support by going the extra mile in their attitude and delivery of care to support the needs of the people who use our services.
