The Beech *Fagus* spp. tree is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

T1) Beech at rear of property: Reduce height and width by branch lengths up to 2m to bring into uniform shape. Tree has been reduced to this specification previously. All cuts strictly to BS3998.

Issues

I hold no objections to the proposed pruning tree works.

The tree has been tipped reduced in the past and responded well.

The specification is within good arboricultural practice and husbandry.
