Site

The Walnut tree T1, as marked on the plan, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Stroud Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

T1: Walnut (6m): Crown reduce by 1.5m and remove major dead wood to keep tree at a size suitable for its location due to close proximity to house.

Issues

I hold no objections to the proposed pruning works. The specification is within good arboricultural practice and husbandry.

This particular Walnut has poor morphology and vigour and is not worthy of a Tree Preservation Order when using a methodology to rate its worthiness.

Note: Walnuts should be pruned late summer, early Autumn as they are prone to bleeding.

Recommendation

No Objection
