Site

The Poplar tree P1, as shown in the photograph, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

P1 Poplar in rear garden: reduce and thin crown by 30% and remove ivy.

Issues

I hold no objection to the reasonable proposed pruning works.

The specification is within good arboricultural practice and husbandry.

The repeat works will remove the poles back to the most recent previous cuts. This is common practice and Poplar generally respond well to restore their crowns.

Recommendation

No Objection
