Site

The Oak *Quercus* spp. tree is situated in the rear garden of the property. It is not publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works (01/03/2023 at approximately 11:30).

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

Mature Oak at rear of property with significant decay in upper canopy: Target prune to reduce weight and sail of branches affected by decay by up to 3 metres; balance remaining crown by up to 2 metres to provide an even flowing and balanced canopy structure.

Issues

I hold no objections to the proposed pruning.

The works will re balance the crown of the tree that forms a line of mature trees on the back boundary.

Recommendation

No Objection
