Details of the pre-application advice received

Design and appearance

You will generally need planning permission for:

- A new shopfront;
- Alterations to an existing shopfront including awnings, canopies, external security shutters, blinds, grilles security measures; and
- Advertisements within the shopfront.

Shopfront alterations should respect the detailed design, materials, colour and architectural features of the shopfront and building itself. Your intention is to emulate the shopfront design at No.447 Lordship Lane, N22 5DJ (Onur gold bakery shop). This design is considered acceptable in principle.

Window Display

The window display is the main visual element of the shopfront. This shop frontage should be largely glazed to maintain a window display rather than creating a solid frontage (including obscured glass) which will be discouraged.

Entrances

- The design of the door should be in keeping with the other elements of the shopfront. The solid bottom panel should align with the stallriser. The top of the door should align with the transom.
- The new shopfront should be designed to be fully accessible to everyone where possible.

Fascia's

- The fascia should be of a suitable size and proportion in relation to the building and should not normally extend above the cornices or below the capital as it would upset the overall balance and proportions of a shopfront or the parade.

Colour and materials

- Material should be chosen for their durability and appropriateness to their location.
- More contemporary materials such as colour-coated steel, aluminium and bronze instead of timber is appropriate in this circumstance.
- Future application or proposal should be accompanied by full details of materials, finishes and colours.

Advertisements and signs

Shops and businesses need to ensure that their name and other details are clearly displayed on their premises and, as a result, signs are among the most prominent forms of advertising on buildings. However, signs that are unsympathetically designed can cause significant harm to the building and the local townscape. Signs should relate well to the character, scale and architectural features of the building and respect their local context.

The Local Planning Authority (LPA) would not object to the replacement of the existing fascia sign in the same position.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
