

PLANNING PERMISSION SCOPE

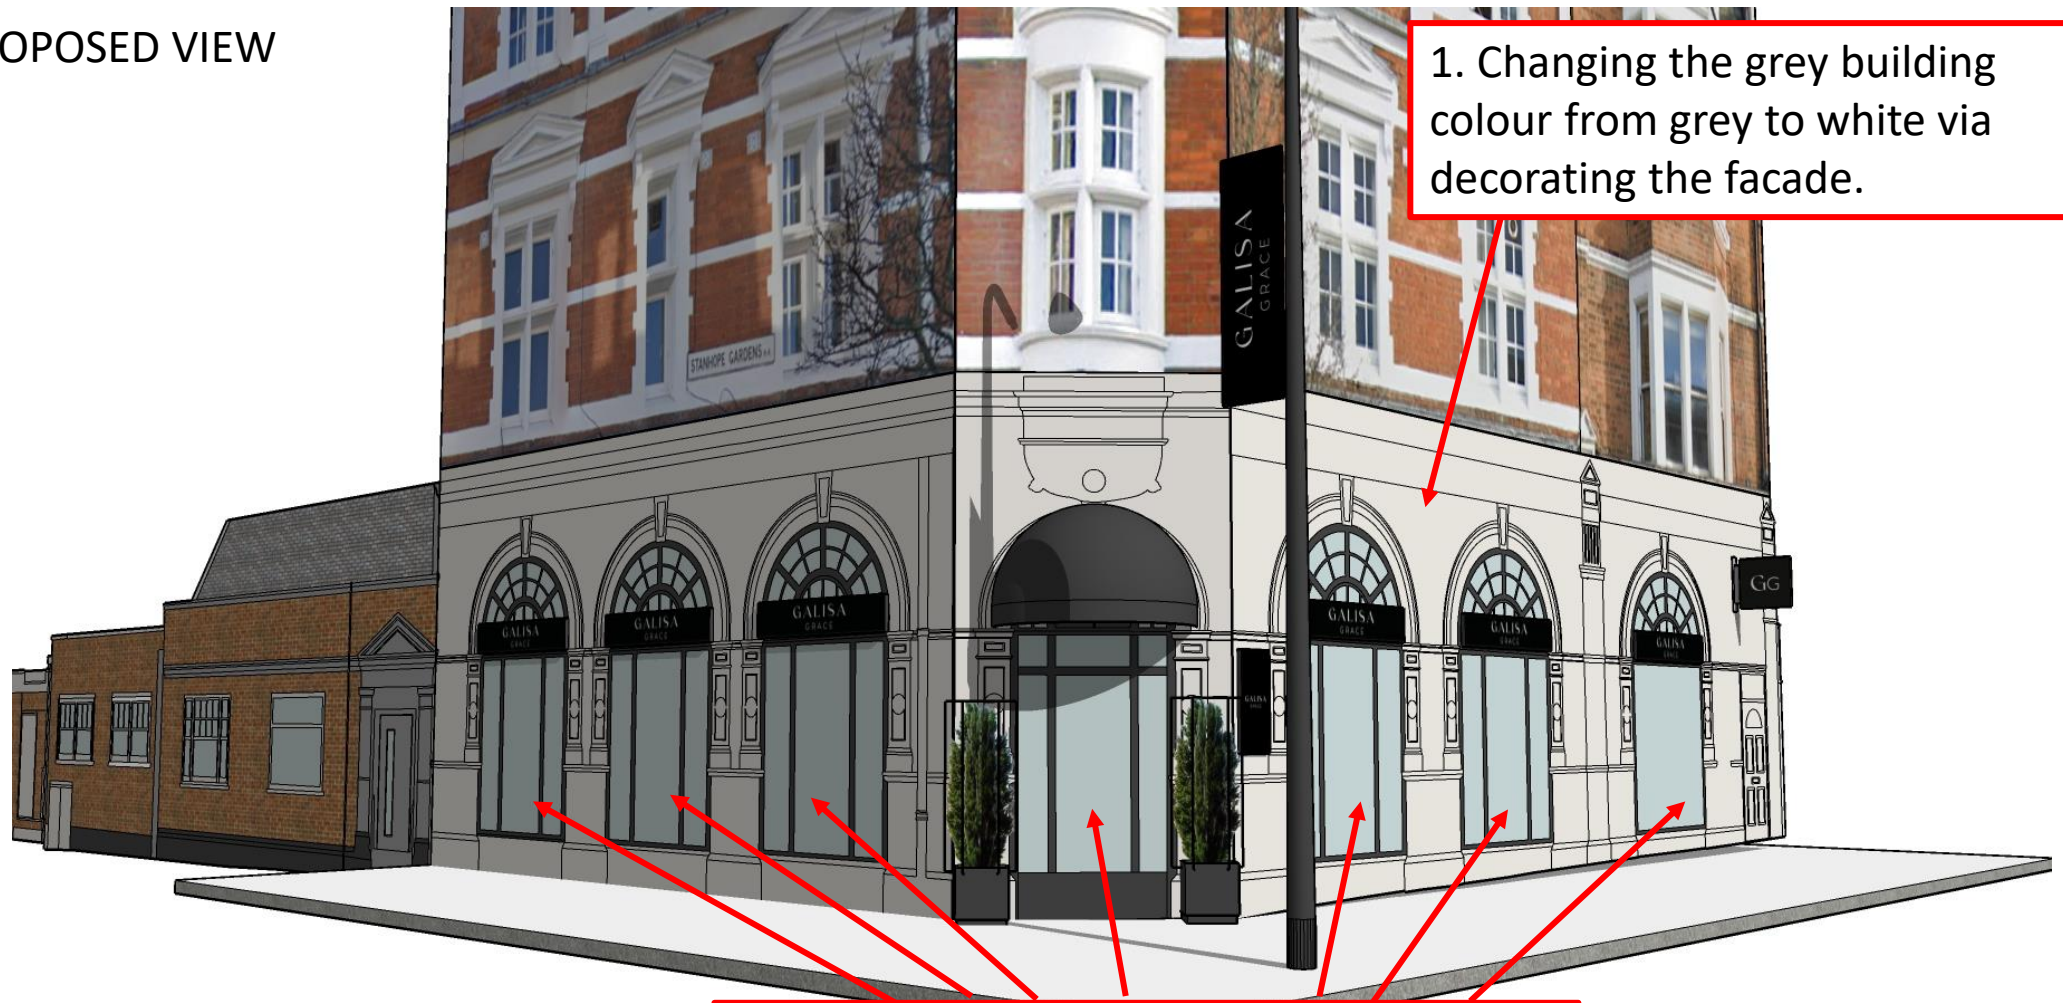

- 1) Changing the grey building colour from grey to white via decorating the facade.
- 2) Painting the six white timber windows and one entrance door frame in black
- 3) Building a new timber entrance door swing and installing it into the existing timber frame. The new door will be in line with the window shape and design.
- 4) Installing illuminated signage on the six timber windows.
- 5) Installing an illuminated projected sign on the facade
- 6) Installing a black fabric dome awning to the main door
- 7) Adding the missing vertical poles to the right window frame (removed by the bank to put ATM machines) and bringing back the original design
- 8) Installing two floating pot holders on both sides of the main door.
- 9) Installing non-illuminated brass sign to the wall next to the shop entrance
