Hi Martin,

Yes, the lighting and all landscape and biodiversity plans are coordinated.

Regards,

Matt

Thank you. Is this proposed arrangement consistent with the public lighting strategy submitted?

Martin

Hi Martin,

The attached Biodiversity Plan has been updated with the below note regarding the lighting:

All locations of bat boxes have been placed
away from proposed lighting to reduce effect
on roosting populations.

Lighting has been design to reduce light spill
and is directed downwards to reduce effects
on foraging bats

Regards,

Matt
