Site

The Holly *Ilex* ssp. tree actually T2, as highlighted in the report, is situated in the side garden of the property. It is indiscernibly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Bruce Castle Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

T1 *Ilex aquifolium* (Holly) - reduce in height by 2m and trim sides to leave a compact shape. Decking at base will need to be lifted and replaced where it meets the trunk of the tree. A gap of 5-10cm is to be left around the trunk to allow for secondary thickening.

Issues

I hold no objections to the proposed reasonable pruning works and the prudent decision to create a gap with the decking to allow future cambium growth.

Recommendation

No Objection
