Site

The Ash tree T3007, as marked on the plan and seen in the photograph, is situated in the rear grounds of the estate. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Alexandra Park Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

T3007 self-seeded Ash tree leaning over the neighbour property to be removed. Some dead wood and significant ivy grow. Timber is to be retained nearby as dead wood habitat.

Issues

I hold no objections to the removal of the low grade Ash tree that has poor morphology and an acute lean.

The tree is within a copse and has plenty of surrounding cover.

Recommendation

No Objection
