Hi Samuel,

Thank you for sending the details of this application at 44-46 Hampstead Lane N6 4LL for review and comment.

I have looked at the documents (Design and Access Statement, Transport statement and Service statement) and noted that waste will be separated into recycling, refuse, food waste and clinical waste and that collections of all material streams, will be provided by a private contractor. The waste will be stored and moved to a collection point within the property and the logistics of this will be managed by on site staff. As long as the waste contractor used is a licenced waste carrier and complies with the [waste duty of care code of practice](#), there is no impact on Haringey.

I couldn't see any details about container sizes, quantities and who would be providing those but in case of interest details about the waste and recycling containers and services Haringey provides can be found at <https://www.haringey.gov.uk/environment-and-waste/refuse-and-recycling>

If there is any other information you need concerning this please let me know.

Kind regards

Ann
