1.0 INTRODUCTION

Acting upon instructions received from Broad Lane Properties Limited as Phase 1 of a Site Contamination Assessment a Desktop Study has been conducted in connection with the proposed development at Broad Lane.

A Site Location Plan and Aerial Photograph Page are presented in **Appendix 1**.

1.1 Scope of Works

This Desktop Study has been prepared in order to address the following features of the study area:

- Site location and description, including adjacent land use, boundaries, ground cover and underground structures.
- A review of the geology, hydrogeology, hydrology and local water abstractions (i.e. pathways and receptors).
- A review of the site and surrounding area, including current land use, surrounding land use and historical land use review.
- A review of local authority and Environmental Agency registers of contaminated land use or pollution incidents (i.e. potential pollution sources).
- Assessment of risks using Source – Pathway – Receptor modeling
- Recommendations for further assessment if required

1.2 Terms of Reference

1. British Standards BS 10175:2011 Investigation of Potentially Contaminated Sites – Code of Practice.
2. *Human Health Toxicological Assessment of Contaminants in Soil - SC050021/SR2 - 2009*
3. *Updated Technical Background to the CLEA Model - SC050021/SR3 - 2009*
4. *CLR11 Model Procedures for the Management of Land Contamination, 2004, DEFRA/Environment Agency.*
5. GPLC1 - Guiding Principles for Land Contamination - EA / DEFRA - March 2010

2.0 SITE INFORMATION

Site Address	Former Car Wash Site Broad Lane Haringey London N15 4QJ
Grid Reference	51.585501 -0.063447
Site Area (Approx.)	0.13 ha

2.1 Proposed Development

The proposed development type is commercial.

2.2 Site Walkover Survey

The site walkover survey was conducted in February 2022. There was no evidence of contamination observed during the walkover.

Adjacent Land Use		Adjacent	Proximal
	North	Residential	Agricultural
	East	Industrial	Industrial
	South	Residential	Industrial
Ground Cover	West	Residential	Residential
	Scrub, Grass, Trees		

Boundaries	North	Undelineated
	East	Undelineated / Existing Drive Edge
	South	Undelineated
	West	Wall

3.0 GEOLOGICAL DATA

3.1 Geology

Site Geology is River Terrace Gravel over Thames Group – Clay, Silt, SAND and GRAVEL. BGS Borehole 845838 shows made ground over, clays, over gravels and below this at 13ft (4m) London Clay.

3.1.1 Natural Subsidence

FIND Maps also details geological dependant risk of Natural Subsidence of the site, which are detailed below.

Hazard	Assessed Risk On Site	
	Present	Level
Potential for <u>Collapsible</u> Ground Stability	Y	V LOW
Potential for <u>Compressive</u> Ground Stability	Y	HIGH
Potential for Ground <u>Dissolution</u> Stability	Y	V LOW
Potential for <u>Landslide</u> Ground Stability	Y	V LOW
Potential for <u>Running</u> Sand Ground Stability	Y	LOW
Potential for <u>Shrinking</u> or Swelling Clay	Y	MOD
Mining	Y	RARE

There is at worst a “High” desk based risk of geotechnical foundation damage to domestic properties indicated within 250m of the site.

Compressibility - Avoid large differential loadings of ground. Do not drain or dewater ground near the property without technical advice.

Running Sand - Avoid large amounts of water entering the ground through pipe leakage or soakaways. Do not dig (deep) holes into saturated ground near the property without technical advice.

3.1.2 Radon Risk

Radon Risk	
Affected Area	
Percent of Homes in excess of Action Level	>1%
Protection Measures Required	<i>“No radon protective measures are necessary in the construction of new dwellings or extensions.”</i>

3.2 Hydrogeology

The Groundwater Vulnerability Map for the site indicates that it **is** underlain by an aquifer in **superficial** strata.

The site is indicated by the Environment Agency **not to be located** within a Groundwater Source Protection Zone.

It is considered that groundwater beneath the site may be of **high** sensitivity to near surface soil contamination, when considering the above classifications.

The site is situated within a source protection zone.

3.3 Hydrology

This reports scope does not allow for the full definition of site specific flood risk.

The site is within Flood Zone 2.

4.0 PUBLIC REGISTER SEARCH INFORMATION

A comprehensive review of available environmental records for the site and its immediate environs has been made; the main points of which are discussed in the following sections:

4.1 Historical Maps and County Archive Material

The site was to start with within open countryside, there were some agricultural uses to the east of site (Cattle Pens) these agricultural uses were in time displaced by industrial uses, with numerous “works” for stationary, footwear and duplicating machines (Neo-Cyclostyle).

By 1961 “works” have expanded to cover the site, and a small courtyard within th the work to north is labelled with “tanks”.

4.1.1 Historical Mapping Summary

From observations made of historic mapping it would appear that the site has had an agricultural use, followed by use as “works” since 1961.

4.2 Environmental Disclosure Report

An Environmental Disclosure Report was commissioned from Landmark on behalf of the Client, a summary of this report can be found in **Appendix 3**.

The following entries of any significance are indicated within the site area (on-site) or within a 250m search radius of the site (off-site).

4.2.1 Agency and Hydrological

4.2.1.1 Abstractions

None recorded within 250m of site.

4.2.1.2 Enforcements

None recorded within 250m of site.

4.2.1.3 Discharge Consents

3 no. water discharge consents within 250 meters of site..

4.2.2 Waste

None recorded within 250m of site.

4.2.3 Hazardous Substances

None recorded within 250m of site.

4.2.4 Industrial Land Use

There are 86 industrial land uses recorded within 250m of site. These relate to cleaners, office supplies, dry cleaners, garages, and petrol filling stations.

4.2.5 Sensitive Land Use

The site is within an NVZ.

5.0 ENVIRONMENTAL RISK ASSESSMENT

Risk Assessment determines the likelihood of a hazard arising. The three principal factors, which are assessed whilst undertaking a qualitative risk assessment, are as follows:

- The presence of a contamination source (SOURCE)
- The existence of a migration pathway (PATHWAY)
- The presence of sensitive targets (RECEPTOR)

Each of these factors will need to be present for exposure of a human or environmental receptor to occur.

The following sections relate to a qualitative risk assessment of the site and surrounding environment. Each of the above principal factors is assessed based on the information obtained from this Desk Study.

This assessment is categorised in accordance with Environment Agency guidance and is summarised over the following pages.

For details of what constitutes the definition of 'contaminated land', 'receptors', 'pathways' as well as Negligible to High risks see **Appendix 6**.

5.1 Sources

CURRENT ON SITE		
Feature	Details	Risk Level
Yard	Not in use currently.	Low

CURRENT OFF SITE		
Feature	Details	Risk Level
Residential		Low
Retail		Low
Scholastic		Low

HISTORIC ON SITE		
Feature	Details	Risk Level
Agricultural		Very Low
Unknown Buildings	Buildings potentially associated with "work"	Moderate
Works	Site part of "works". Works could have manufactured stationary, or duplicate machines. This might include use of machinery with associated fuels and lubricants, and also manufacture of storage of inks, glues, varnishes etc.	Moderate

HISTORIC OFF SITE		
Feature	Details	Risk Level
Agricultural	Works. Various works. As listed in previous chapters. Possibility for diffuse and run-off pollution to affect site.	Moderate

5.2 Pathways

DIRECT PATHWAYS	Present	Details
Direct Contact	N	Site users may come into contact with potential contaminated soils (if present) in open areas of the proposed development.
Direct Ingestion	N	Ingestion of contaminated soils (if present) by direct ingestion of soil or through ingestion.
Direct Inhalation	N	Inhalation of contaminated dust and hydrocarbon vapours (if present) in open areas of the site and within new structures
Inhalation of Wind Blown Dust	N	Inhalation of contaminated dust (if present) from on site and off site sources

INDIRECT PATHWAYS	Present	Details
Contaminant Migration	Y	Migration of contaminants, either as Non-Aqueous Phased Liquids (NAPLS) or Aqueous Phased Liquids (APLS) through permeable strata.
Hydrocarbon Vapour Migration	Y	Migration of on-site sourced vapours to impact on adjacent sites or off-site sourced vapours to impact on site through migration
Ground Gas Migration	Y	Migration of on-site sourced ground gases to impact on adjacent sites or off-site sourced gases to impact on site through migration

5.3 Receptors

RECEPTOR	Potentially Impacted	Details
Human Health		
Current Site Users	N	Imagery, Historic Maps, and Agency Data show the site is not contaminated.
Future Site Users	Y	Imagery, Historic Maps, and Agency Data show the site is not contaminated. Although there may be an indirect exposure pathway from ground gases.
Site Construction Workers	Y	Imagery, Historic Maps, and Agency Data show the site is not contaminated.

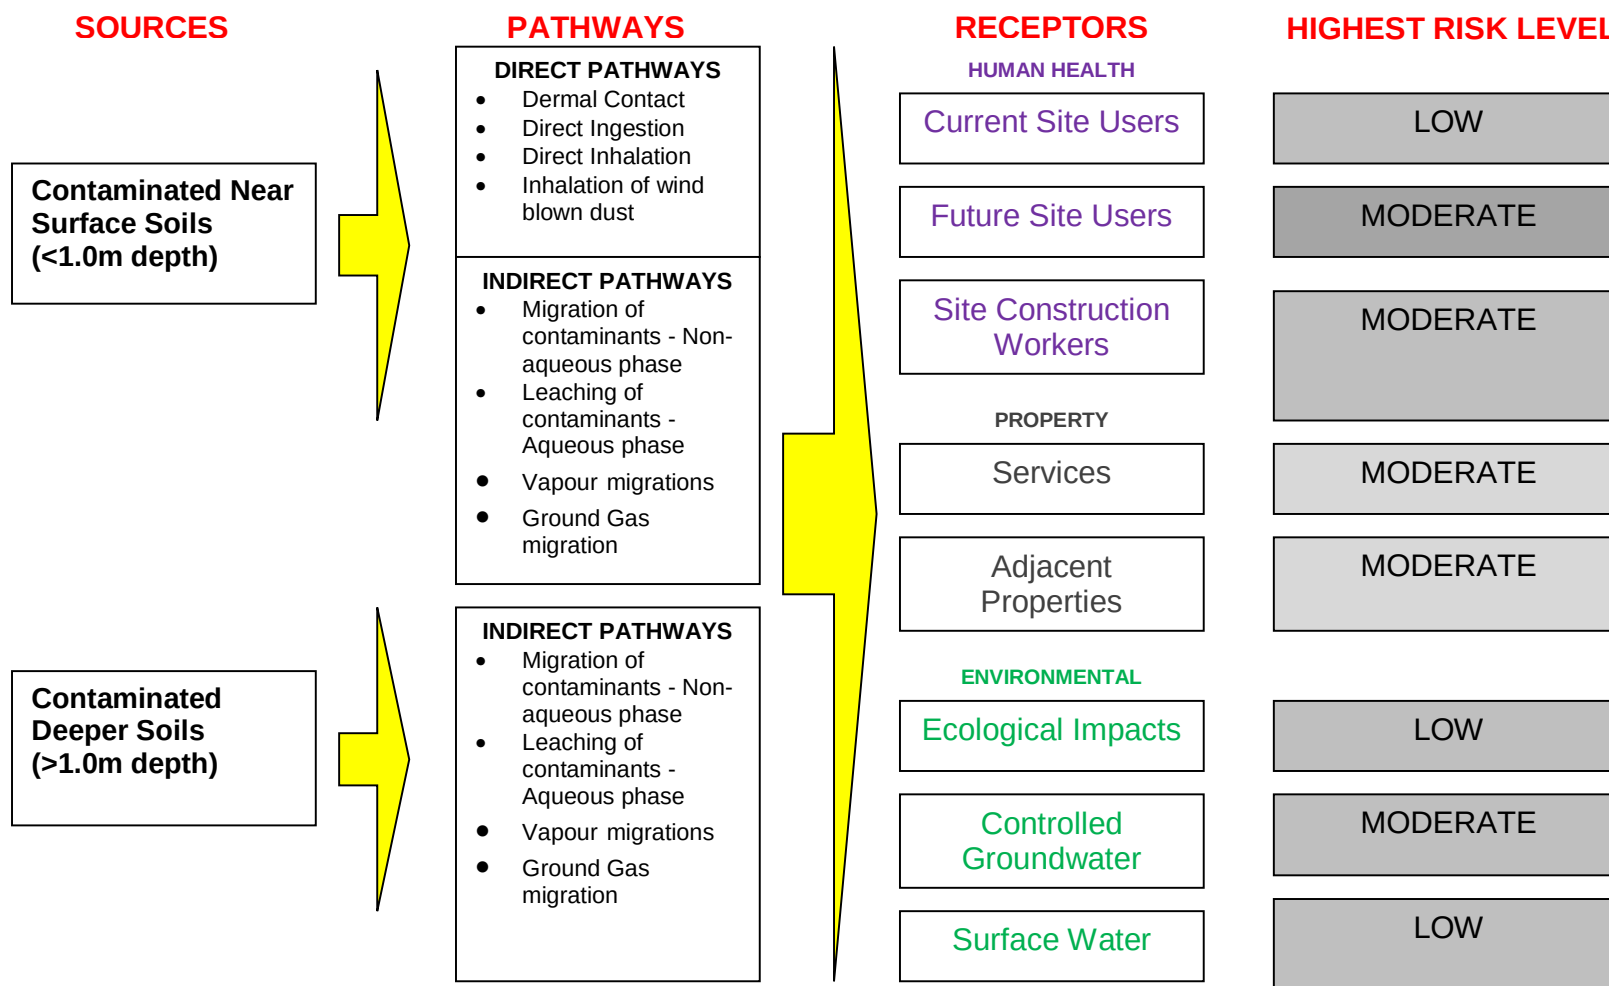

RECEPTOR	Potentially Impacted	Details
Users of Property	Y	Imagery, Historic Maps, and Agency Data show the site is likely to be contaminated .
Property		
Services	Y	Imagery, Historic Maps, and Agency Data show the site is likely to be contaminated . Although there may be an indirect exposure pathway from ground gases.
Adjacent Properties	Y	Imagery, Historic Maps, and Agency Data show the site is likely to be contaminated .
Environmental		
Ecological Impacts	N	The existing site may not be considered to be of ecological value.
Controlled Groundwater	Y	The site does lie above controlled ground water.
Surface Water	N	No surface water features in the immediate vicinity.

5.4 Qualitative Human Health and Environmental Risk Assessment

The Desk Study **has** identified potential sources of contamination from the previous use with risks to the potential targets identified above.

Qualitative Human Health and Environmental Risk Assessment

6.0 CONCLUSIONS

The site represents moderate risk of significant harm to site workers and future site users.

A Phase 2 assessment should be carried out so as to quantify risk and provide a mitigative response if required. Plan for investigation is provided in Appendix 4.

These mitigatory measures if optimised for mitigative effect, will provide adequate mitigation in all the but the most severe contamination scenarios. We are not of the opinion that contaminated land constraints should obstruct grant of planning permission and request that further investigative works be included as a condition of planning permission.

7.0 CERTIFICATION

This report is produced for the sole use of the Client, and no responsibility of any kind, whether for negligence or otherwise, can be accepted for any Third Party who may rely upon it.

The conclusions and recommendations given in this report are based on our understanding of the future plans for the site. This report is to be used in conjunction with planning applications only. The report is not to be used to form an opinion of value with regards to the site.

If the site is developed for a more or less sensitive use, then a different interpretation might be appropriate.

The report has been prepared following the guidelines and principles established in the British Standards, BS 10175:2001, entitled 'Investigation of Potentially Contaminated Sites – Code of Practice' and the DEFRA/EA Contaminated Land Science Reports.

It necessarily relies on the co-operation of other organizations and the free availability of information and total access.

No responsibility can, therefore, be accepted for conditions arising from information that was not available to the investigating team as a result of information being withheld or access being denied.

The scope of this Desk Study was discussed and agreed with the Client. No responsibility is accepted for conditions not encountered, which are outside of the agreed scope of work.

This report may suggest an opinion on a possible configuration of strata or conditions between exploratory points and below the maximum depth of investigation. However, this is for guidance only and no liability can be accepted for its accuracy.

APPENDIX 2

Historical Maps

London

Published 1850

Source map scale - 1:5,280

The historical town plans shown derive from Ordnance Survey mapping from the early to mid 1850s. The 1:2640 scale was introduced in the early 1850s, to survey districts covered by the Local Boards of Health and for a map of the Osborne Estate of Queen Victoria. The general style is similar to that of the early 1:2500s published shortly afterwards.

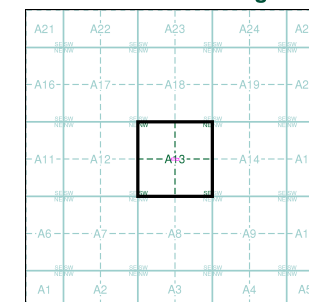

1:5280 scale was surveyed shortly afterwards in the mid 1850s as general purpose mapping with a standard of content similar to the more contemporary 1:10,560 mapping. The scale was also used for a reduction of the 1:1056 'skeleton survey' of London that was undertaken between 1848 and 1850.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

Additional SIMs

Published 1977 - 1990

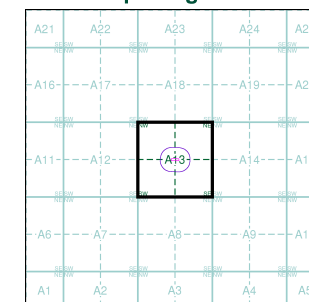

Source map scale - 1:1,250

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are further, minor editions of mapping which were produced and published in between the main editions as an area was updated. They date from 1947 to 1994, and contain detailed information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1992 - 1994

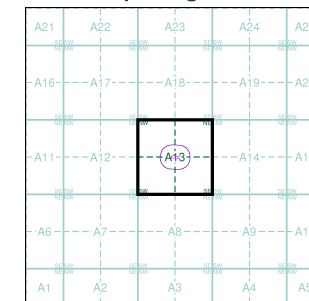

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

APPENDIX 4

Proposed SI

Sampling Regime

Supplimental:

Window Sample Location to be focussed around predicted hot spots.

Full Services sweep to be made with CAT Scanner, Careful Checks for Presence of USTs

Trial pitting to be used before boring comences on each position.

Ground Water & Gas Monitoring over 3 Months

3 no. Gas and ground water wells to water table.

Soil samples sent for suite testing and subsiquent quantitative risk assessment.

All other works to be agreed with client in the scope of a Phase 2 Investigation.

Southwest Environmental Limited

Receptors and Description of Significant Harm

Type of Receptor	Description of harm that is regarded as significant harm
Human beings	Death, disease, serious injury, genetic mutation, birth defects or the impairment of reproductive functions. Disease is taken to mean an unhealthy condition of the body or a part of it and can include, for example, cancer, liver dysfunction or extensive skin ailments. Mental dysfunction is included only insofar as it attributable to the effects of a pollutant on the body of the person concerned.
Ecological systems SSSIs National Nature Reserves Marine Nature Reserves Area of Special Protection of Birds Special Areas of Conservation Special Protection Areas Any European Site covered by Regulation 10 of the Conservation Regulations 1994 RAMSAR Sites National Parks Candidate Sites for designation as Special Area of Conservation or Special Protection Area	For any protected location: - Harm which results in an irreversible adverse change, or in some other substantial adverse change, in the functioning of the ecological system within any substantial part of that location; - Harm which effects any species of special interest within that location and which endangers the long-term maintenance of the population of that species at that location. In the case of locations which are designated European Sites (or a candidate Special Area of Conservation or a potential Special Protection Area), harm which is incompatible with the favourable conservation status of natural habitats at that location or species typically found there.
Property Crops including timber Produce grown domestically and on allotments Livestock Other owned or domesticated animals and wild animals that are the subject of fishing or shooting rights	For crops, a substantial diminution in yield or other substantial loss in their value resulting from death, disease or other physical damage. For domestic pets, death, serious disease or serious physical damage. For other property a substantial loss in its value resulting from death, disease or other serious physical damage. A substantial loss in value should be considered as occurring only when a substantial proportion of the animals or crops are dead or otherwise no longer for their intended purpose. A 20% reduction in yield or loss in value should be regarded as what constitutes substantial loss or diminution.
Property in the form of buildings	Structural failure, substantial damage or substantial interference with any right of occupation. disease or other serious physical damage. A substantial loss in value should be considered as occurring only when a substantial proportion of the animals or crops are dead or otherwise no longer for their intended purpose. A 20% reduction in yield or loss in value should be regarded as what constitutes substantial loss or diminution.
