Subject: RE: Berol Quarter - GLA Stage 1 response

Hi Phil,

Having regard to the QRP comments, submitted following the preparation of the Stage 1 report, GLA Officers are now generally satisfied that the urban design considerations in relation to height, massing, separation distances are appropriately resolved. Nevertheless, a full assessment against Policy D9 (including functional and environmental impacts) should be provided within the planning committee report and will be considered by GLA Officers at Stage 2.

Given the references to the delivery of the bridge in the QRP report, could full details of this aspect please be provided in the committee report to assist GLA officers when preparing their Stage 2 report.

I would note that I am hoping to issue further comments to the applicant later today regarding the energy, WLC and Circular Economy spreadsheets. I will CC you in on any response.

Kind regards,

Rohan

Hi Rohan,

You mentioned previously that you would look to update the design comments following receipt of the final QRP report.

Can you send something over by email?

Thanks,

Phil.
