Site

The Pine *Pinus* spp. T1 and Magnolia T2 trees are situated in the front and rear garden of the property. The Pine T1 publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works (18/05/2023 at approximately 12:15pm).

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

T1 – Pine sp. (*Pinus Wallichiana*) - Height historically reduced. Re-reduce height to previous reduction points by approx 3m. Lightly trim sides to shape by approx 1-2m where required to balance crown. Remove dead wood over 2" diameter

T2 - Magnolia - Raise crown to give a balanced lift of approx 1m . Reduce height extension growth by 1-2m only to form a rounded top. Prune in any extraneous growth to balance by approx 1-2m.

Issues

I hold no objections to the proposed works.

The Pine has been topped and reduced before. Not ideal for the species.

However, the crown has restored itself.

The reducing of the height regrowth will not affect the morphology of the tree.

This is not an overall reduction but selective peripheral growth is to be reduced.

At the time of inspection the tree was chlorotic.

Recommendation

No Objection
