Site

The Thuja tree, as marked on the plan and seen in the photograph, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

Thuja - Cut the entire tree to round level

The tree is growing too close to the boundary wall for its future growth. There are concerns that it may cause damage to the wall over time.

Issues

I hold no objections to the removal of the Thuja tree which is low grade and not worthy of a tree preservation order when using a methodology to rate its worthiness for further protection.

Recommendation

No Objection
