Subject: RE: Planning Services - General Enquiry - Ref: HC-110051892

Details:

The tree needs to be removed as it is dead. The tree next to it fell down in storms at the start of 2022 and probably damaged the roots of this one when it fell as this didn't come into leaf last year and now is very clearly dead.

The tree was a copper beech.

It is located in the rear garden close to the fence adjoining number 49's garden, approximately 10 metres from the rear conservatory of the school, on the left of this photo:

Further images of the tree viewed from the garden:

The building on the right here is number 49 and on the left is the school.

Thanks for your help with this and please do let me know if you need anything further.

Kind regards
