Dear Martin

Further to our conversation please be advised that we are satisfied that we have sufficient information to approve the application for a variation in trading hours. We have determined that this is likely to be a low risk for complaints since deliveries are received in the basement. This is on the proviso that the servicing/delivery times remain as they are currently (no earlier than 8:30am).

The applicant should be advised that in the event this variation results in an increase in complaints about noise nuisance the council will take enforcement action which could include the issue of an abatement notice to restrict specific activities at this premises.

I hope this answers your query but do let me know if you need further information.

Yours sincerely

Jennifer Barrett
Noise and Nuisance Manager
