Subject: RE: Dangerous trees - 5 days notice to carry out essential work to a dangerous tree in a conservation area

Dear Mr Hallett-Wells,

Thank you for the confirmation below.

It is clear from the photograph that the suppressed Lime tree is dead. Please take this email as confirmation to fell the Lime tree under a five-day notice.

There is a condition to re plant:

Recommend 10-12cm girth *Prunus* spp.

Any other additional work will require an application via the Portal.
A reputable Arborist will be able to advise on this matter.

Regards,

Daniel Monk
Senior Arboricultural Officer (Planning)

Dear Mr Monk,

Thanks for you email.

The lime tree is not actually shown in the Tree Protection Plan, the Existing Tree Plan or the Tree Survey Schedule. The lime tree It is between T12 and T13 - see 1st photograph. Can we infer that the lime was not considered to be of sufficient value to be included in the arboricultural assessment in the schedule or either of the plans because it was already dead?

I have also attached photographs of the lime tree showing the lack of foliage, except for ivy.

I hope these are sufficient.

Regards,

Chris

My address is 13 Stanhope Gardens, Highgate, London, N6 5TT

The trees are in the land behind our house. Sometimes known as 11-13 Stanhope Gardens. Or Land to the West of Alford House.
