Porch for the Rear Entrance application

Purpose of the project is to build a 2sqmt porch for the rear entrance of the house.

We did a pre-application for the different possibilities for this house and then we decided to build a porch for the rear entrance for this single large house.

The resident and owner Mr Orhan Dursun and his family use rear entrance because of the rear garden facilities. His kids play in the rear garden and bicycles are also in the rear garden.

Therefore, we would like to build a porch for the rear entrance. We do not want a porch for the front entrance.

This 2sqmt porch will keep warm to inside of the house.

Feel free to discuss matters.

We happy to accept your conditions for the approval.
