**Importance:** High

Hi Chris,

Please take this email as confirmation to make safe the \*two dead horse chestnut trees adjacent to the Highway (monolith to a safe height or remove). (\*Three trees to re plant.)

If removed there is a condition to re plant dead dying and dangerous. For continuity of the avenue maidens should be planted near to the monoliths or removed trees.

Diversity is needed within the avenue. Recommend re planting with *Aesculus indica* (more resistant) or *koelreuteria paniculate* 10-12cm girth.  
Species choice is open to discussion.

Regards,

Daniel Monk
