

PROTECTED TREE REPORT (TREE WORKS)

Haringey Council, L4, Alexandra House, Station Road, N22 7TY

Application number	HGY/2023/1391
Application type	Conservation Area Notification
Site Address:	Flat 1, 1 Bishops Road, Hornsey, London, N6 4HP
Proposal	T1 Walnut - Reduce to previous reduction points and remove regrowth on a regular basis Reason: Clay shrinkage subsidence damage at subject property.

RECOMMENDATION:	No Objection	
Application date	24/05/2023	
Tree Inspector	DM	Date: 26 th June 2023

Site

The Walnut *Juglans* spp. tree T1, as highlighted in the sketch, report and photographs, is situated in the rear garden of the property. It is publicly visible from the highway and footway The Park N6.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

T1 Walnut - Reduce to previous reduction points and remove regrowth on a regular basis

Reason: Clay shrinkage subsidence damage at subject property.

Issues

From an arboricultural point of view, I hold no objections to the proposed works. The Walnut tree has been reduced a couple of times, and restored its crowns.

Walnuts bleed when pruned and any pruning works should be carried out late summer, early autumn.

The tree is implicated with indirect damage. An Arboricultural report and Engineer's statement has been submitted however, no soil analysis has been presented or level monitoring.

There is mention of trial pits and boreholes, so I assume there are recent soil analysis reports.

Recommendation

No Objection
