Subject: RE: Planning Consultation - LB Haringey - HGY/2023/1216 - Rear garden of 17 Sirdar Road, Wood Green, London, N22 6QP

Hi Daniel,

I've had a look at the information provided for this application HGY/2023/1216 - Rear garden of 17 Sirdar Road, Wood Green, London, N22 6QP

The waste and recycling provision is slightly lower than we would advise for these properties especially when accounting for fortnightly residual waste collections. According to our revised supplementary planning guidance (see below) each flat should have 140 litre capacity for refuse and recycling and 25 litres for food waste and we would recommend rounding up rather than down. If an additional 140 litre bin was added each to the proposed recycling and refuse bins and an additional 2 x 23 litres external food waste caddies, this would be acceptable.

Refuse allocation	Capacity	Approximate bin dimensions
Per 1 bed, low-rise dwelling when supplied for sole use.	140 litres	550mm D x 500mm W x 1060mm H
Per low-rise dwelling with more than 1 bed, when supplied for sole use.	240 litres	740mm D x 590mm W x 1080mm H
Dry mixed recycling allocation		
Per single 1 bed dwelling when supplied for sole use.	140 litres	550mm D x 500mm W x 1060mm H
Per single 2/3 bed dwelling when supplied for sole use	240 litres	740mm D x 590mm W x 1080mm H
Food waste allocation		
Per dwelling	25 litres	350mm D x 300mm W x 360mm H
Garden waste collection is an opt-in subscription service with a weekly collection via 140L or 240L wheeled bins or by biobags. Lids must be closed, and no side waste/excess waste will be collected. Any property that has potential to produce garden waste must have adequate and suitable space to store and collect a 240 litre bin alongside all other bins, off of the highway.		

If there is any other information you need concerning this please let me know.

Kind regards

Ann
