Nox emissions relate to boilers that burn fossil fuels like gas and oil etc that emit emissions from the boiler flue.

Electric boilers don't have a flue and heated by electric elements/heatex. Our boilers don't produce nox levels. So 0% nox levels.

Regards

Rob Sale

Hi Robert,

We have installed the following boilers at the above project:

COMET 14.4KW ELECTRIC SYSTEM BOILER
Product code: EHCCOM15KW

Please confirm the boilers have dry NOx emissions not exceeding 40 mg/kWh of dry NOx (at 0 % O₂).

Kind Regards

Christopher Matthews
