Site

The two Cherry trees, as seen in the photographs and marked on the plan, are situated in the communal grounds. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Alexandra Park Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Two cherry trees at the park boundary posing a risk of falling into neighbour's property.

Trees info:

- Cherry tree 15cm diameter 10m height, leaning tree in decline with recent movement.
- Cherry tree 10cm diameter 6m height, dead tree

The proposed works are to fell the trees and stack the timber on site as dead-wood habitat.

Issues

I hold no objections to the removal of the fallen hung low grade cherries.

There is a condition to re plant dead, dying, and dangerous trees within a Conservation Area however, from the photographs, succession should occur within this area.

Recommendation

No Objection
