Site

The pollarded Lime tree T1 is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Woodside Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Front garden:

Lime T1 - reduce crown by 3 metres and back to original pollarding points at 3 metres high.

Issues

I hold no objections to the proposed pruning works.

The Lime has been managed at different pollarded levels. This is a common regular management practice for the species.

The crown will respond well and restore itself over a short period of time.

Recommendation

No Objection
