London N17 9UY

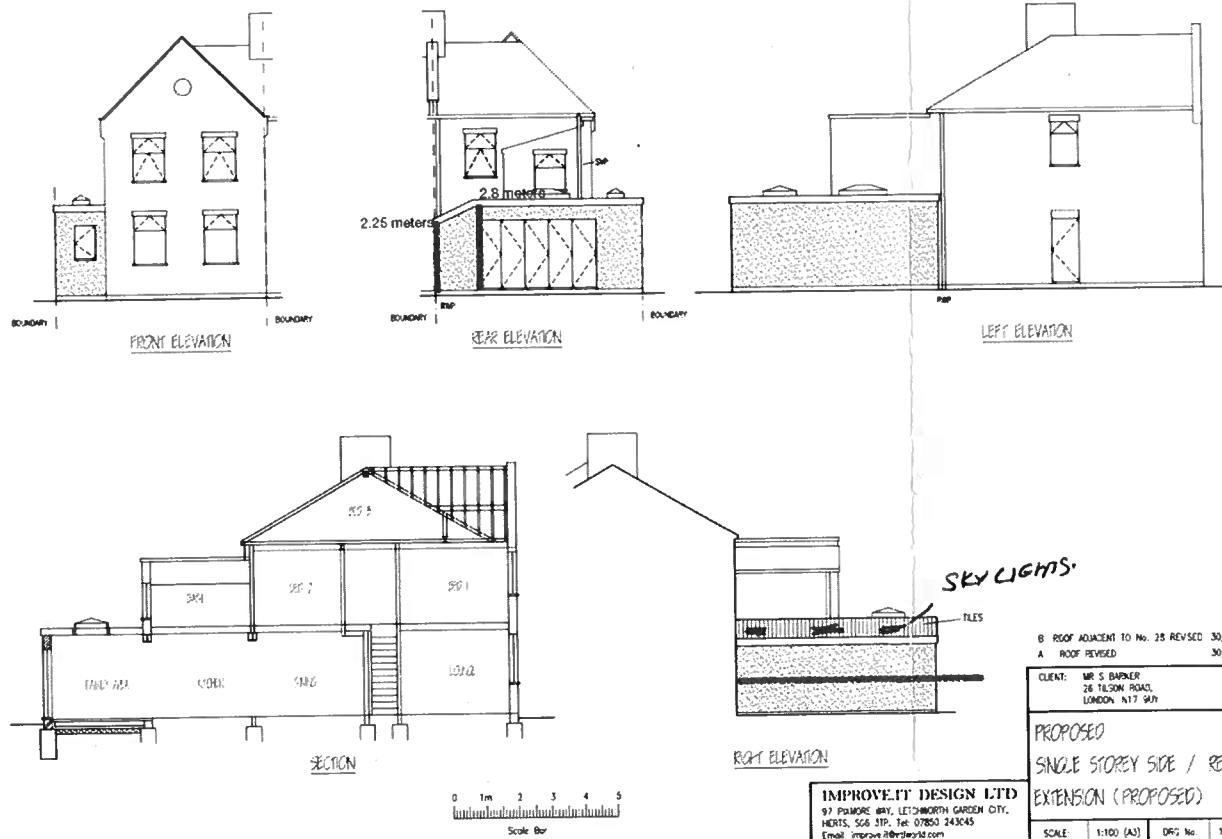

To Whom it may concern

We have received a letter of planning from No 28 Tilson Road for a proposed extension of 3x meters high x 5 meters long

We would contest the height and insist that it matches ours at 2.8 meters and would also need to see the extension roof to be angled away from our property (no 26) from an adjoining height of 2.25 to the full height of 2.8. So as it will not block our light into our extension windows that span our extension on that side. We had to do this when we did our extension so we did not do the same to no 28. Please see my drawings that I have sent to your office to show the issue. We also are worried about the length of the extension as it will be joined to ours and we would not want it to project any further than ours? We would like this to be considered as it will look very bad from our side.

Yours sincerely
Sam Barker

REAR ELEVATION 26 TILSON ROAD

In order to comply with planning we had to build our extension to the maximum height of 2.8 meters

We then had to angle the extension down to the height 2.25 meters in order to not block no 28's light. SEE DRAWINGS

We would insist that the same courtesy was shown to us .
