

Dear Ms Madondo,

This Application has to be dealt with on its own merits and our Objection letter demonstrates the significant harm that would be caused in terms of the relationship between no.s 166 and 168. The fact that both buildings comprise flats with a flat roof to the rear (with a different and more intensive layout to houses) and the lack of a 'fallback' position are particularly relevant and we feel that none of the highlighted examples justify this specific proposal.
