Match Day Facilities

Match day staff are made up of the following groups:

|                                 |     |
|---------------------------------|-----|
| Stadium management team         | 10  |
| Match day administration        | 10  |
| General admission catering      | 420 |
| Hospitality reception and hosts | 70  |
| Club Level catering             | 350 |
| Suite catering                  | 220 |
| Betting                         | 60  |
| Stewards                        | 800 |
| Cleaners                        | 60  |

Catering, hospitality and cleaning staff will enter the stadium via a dedicated entrance at level 00 to the north-west of the stadium into an accreditation area with security office. From there staff will progress to the uniform store, changing areas with toilets and locker facilities.

Stewards will access the stadium in the south-east at level 00 from Worcester Avenue. They will move through an accreditation area with office, radio store, with 1000 locker, bib drying room and toilets.

Metropolitan Police Facilities

The Metropolitan police facilities will be provided at level 00 with parking for two Sprinter type vehicles adjacent. The police will share the briefing room with the stadium staff and other emergency services, located at level 00 in the south-east. The facilities will incorporate reception, working area, interview room, kitchenette and two unisex WCs, but no holding cells will be required.

Medical Centre

The principal medical centre will be in the north-east corner near to the pitch access tunnel and a lift core for ease of access for stretchers and proximity to the ambulance parking bay. It is intended that free movement of the ambulance can be maintained though the good yard and Sainsbury's' goods yard. It will include a treatment room, accessible toilet and storage facilities.

Ground Staff and Maintenance Facilities

There will be a small office co-located with the grounds keeping facilities store which will be adjacent to the pitch access tunnel to the north-east. This will be the principal store for the equipment required including an area for up to 9 grow lighting rigs.

A football equipment store will be located next to a pitch access tunnel in the south-east corner. It is intended that the grounds-keeping staff share the maintenance staff facilities in the south-east at level 00 for changing and break facilities.

A stadium maintenance suite will be located in the south-east corner of the stadium.

Service Yard

The main service yard to the north-east will be primarily access ed from the Sainsbury's goods yard accessed from Northumberland Park, and link through the stadium to a vehicle access tunnel to allow articulated vehicles onto the pitch. A 4.5m height clearance will be maintained for this, and any ramps and cross falls in the service yard have been assessed by Buro Happold to ensure that gradients are within the limits of vehicles turning and manoeuvring to include articulated vehicles making deliveries and refuse vehicles picking up compactors.

The goods yard will be the main delivery and refuse pick up and include areas for the following:

- Loading / unloading dock
- Goods holding
- Barrel storage
- Refuse collection
- Recycling and compaction

A secondary service route will enter the building from the south-west entrance from Worcester Avenue which will maintain minimum 3m clear headroom to allow smaller vehicles more

direct access to the Tottenham Experience and hotel. This is to allow for deliveries, waste, recycling and compaction will be circulated via the service road to the main refuse collection point in the north-east.

**Media Centre**

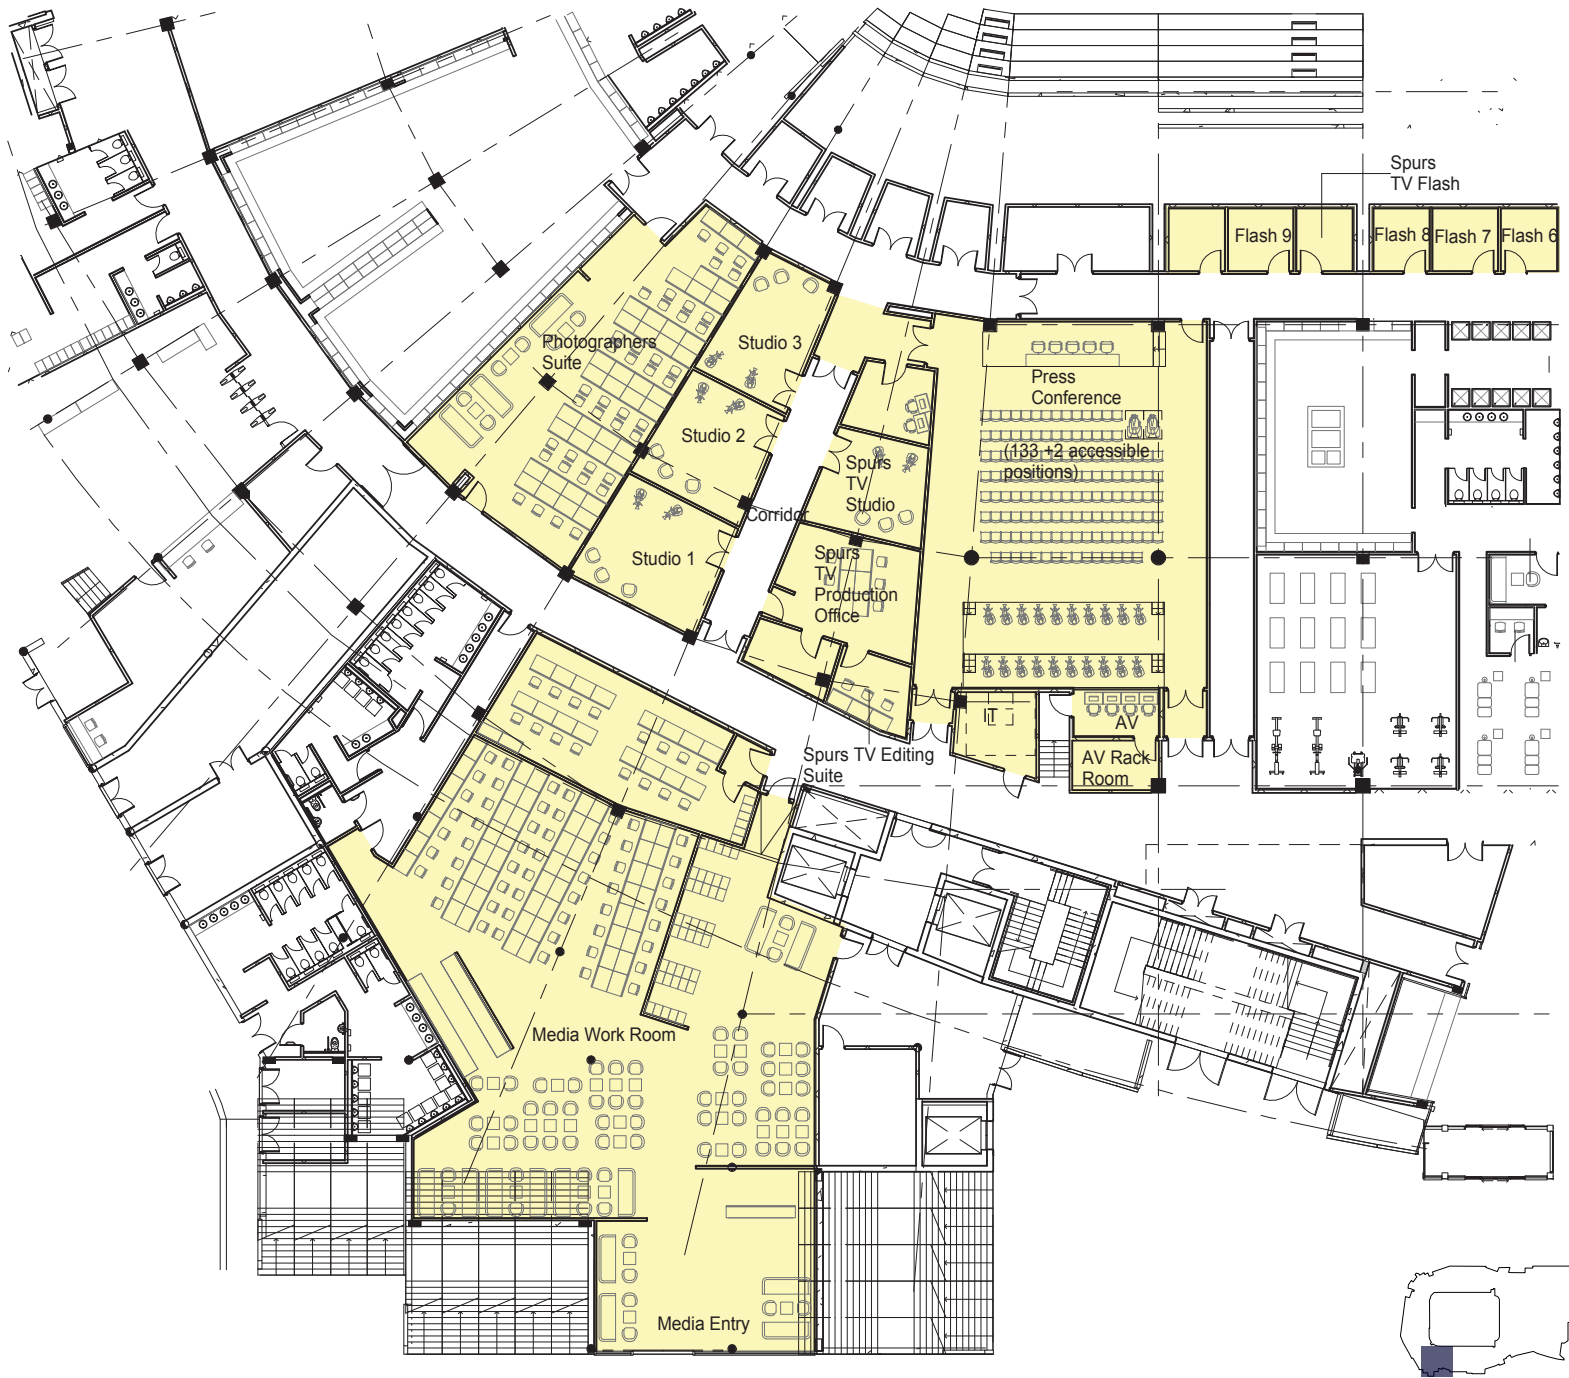

The media suite will be accessed from the north east corner of the stadium with a dedicated entrance at level 00 from the High Road and will consist of:

- Reception and accreditation area
- Work room and with space for 50 desks
- Lounge area with additional seating for up to 70 press
- Bar / buffet
- 120 seat conference room with dais, platform for up to 20 cameras, translation booth and two AV rooms
- 120 lockers
- Toilets
- Sky Studio
- 3 TV studios
- Media production room

The media will access their seats within the bowl via a corridor separate from the player facilities and via stair and dedicated vomitory to the press tribune in the lower tier. This corridor will also link into the mixed zone located between the players changing rooms.

Two TV studios will be located at level 04 with pitch view, accessed by lift in the north-west core, one permanent and the other used as match-day hospitality when not in use as a TV studio.

Photographers will enter the stadium with the written press. After accreditation they will use the north service corridor to access a dedicated workroom next to the north-east pitch access tunnel.

#### 7.5.6 NFL FACILITIES

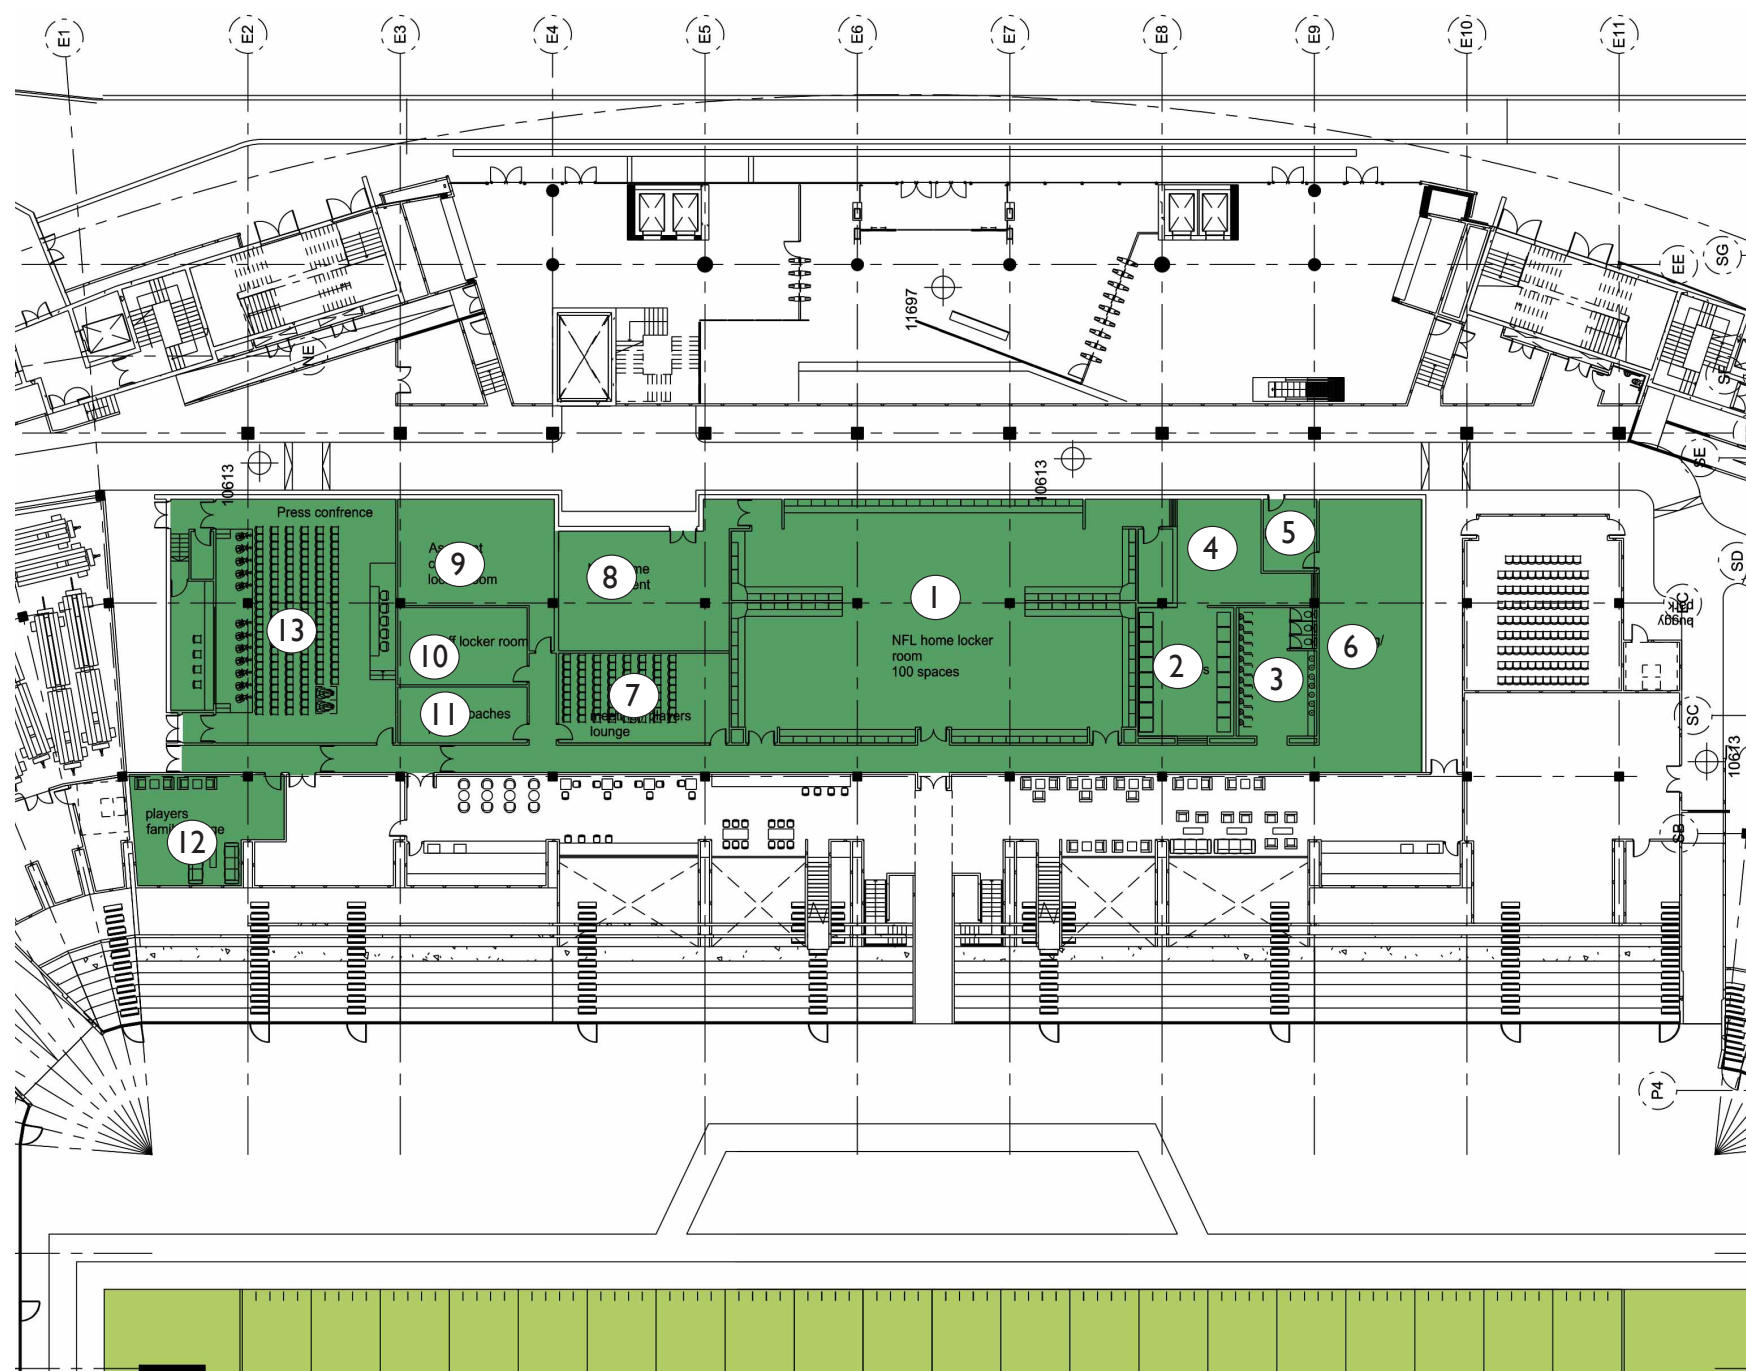

The new stadium for Tottenham Hotspur Football Club (THFC) has been designed to accommodate the functional and technical requirements of both soccer and American Football, in order that the venue can successfully host both sports.

There are a number of key differences between the design of a typical NFL stadium and UK stadia. These include the size of the playing surface, the location of teams during a match, the relationship of spectators and sightlines to the field of play, the accommodation required by players and officials, the operational strategy for running matches and the requirements of media. There are also differences in the nature of pre-match and post-match activity, in and around the stadium, that need space to be accommodated.

The NFL currently runs American Football matches in stadia that were designed for soccer, but in order to do this a series of compromises are required in the way in which these venues are set up to host such events. Lower sections of seating are often covered because of obstructed sightlines, which pushes spectators further away from the field of play, while temporary overlay is often required to provide accommodation for players, officials and media.

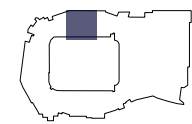

The new THFC stadium has been designed to give visibility and prominence to each sport, which will enable both to have a strong identity when hosting matches. It contains a playing surface and seating bowl that has been designed to provide ideal conditions for both codes, as well as the combination of dedicated NFL shell spaces and other shared spaces that meet all of the needs of players, officials, broadcasters and spectators for both soccer and American Football.

With NFL being played in Tottenham, there will also be significant exposure of the Tottenham area to a “new” audience – with over 80% of NFL International Series season ticket holders coming from outside London.

**Indicative Layout - NFL Team 1 Locker Room**

The 'Home' NFL locker facility is located at Level 00 in the east stand centrally giving easy access to the NE corner tunnel and the central east player's tunnel. The facility occupies an area of 1,448 sqm (15,586 sq ft) and includes the main locker room for the player's, facilities for the coaches and player's families, meeting rooms, stores and medical facilities. Additionally a separate press conference facility is located adjacent to the locker room for sole use for the 'Home' designated team for press conferences and for pre match briefings. These facilities are designated as NFL primary user areas and will be fitted out in line with NFL requirements with any soccer use being of secondary use.
