- 2 Paving (Granite)
- 3 Bollards
- 4 Seating bollards
- 5 Trees in resin bound gravel (Whitebeam)
- 6 Climbing plants on wall
- 7 Street pole luminaires

13.4 Podium

SOUTH PODIUM SQUARE

Making a place that operates as the gathering, event and arrival area for fans during match and club functions, supporting the Tottenham Hotspur Foundation program and use (such as festivals, fundraising events, beach volleyball, extreme sports coaching projects, street dance, parkour, NGB events – static bike competition, rowing challenges); community events for school children and elderly. Match days, the podium is activated with pop-up food stands, football exhibitions, and fan branding opportunities. Catering for large crowds; the ebbs and flows of people arriving and leaving; fans soaking up the pre match atmosphere (music, food, stands, football paraphernalia) or just being there as part of the atmosphere.

The following outlines the core principles for making the podium square an important place for Tottenham.

Quality Design

The design addresses pedestrian movement for large crowds; adjacencies to surrounding buildings and use; sun, shade and wind; integration of functional requirements, such as vents into the design; responding to the overall character of the context to develop to create a unique place.

Comfort

The design aims to make a comfortable place for all; for all seasons; be robust and flexible in use to accommodate large crowds and for small gatherings on non-match days.

Provide seating for all (wheelchairs, elderly, pram users, children, youth and elderly).

Planting design that provides seasonality. For example the landscape needs to be able to provide a setting during winter.

Pedestrian Movement

The crowd movement for match days and events has been assessed and the elements have been designed to ensure pedestrian movement is not restricted.

Activated with multitude of program

The Square is activated with water features, multi-use hard court, gardens, abseiling drop zone and associated building program (cafes, extreme sports and museum).
