

NORTH PODIUM

The principles from the South Podium are applied to the North Podium, ensuring provisions of seating, high quality pavements and landscape. The crowd movement constraints of the site does restrict the expanse of the landscape potential, however strategies, such as integrating lighting on the underside of the building facade, ensures the walkways are free of lighting poles. The away fans arrival stairs are generously planted with trees selected for their canopy height and slender trunks suitable to be planted in close proximity to create a grand arrival avenue.

KEY

- 1 Cascade planter
- 2 Trees planted as dense copse
- 3 Patterned and coloured walls
- 4 Stairs with stainless steel handrails
- 5 Lift
- 6 Ticket office
- 7 Yellow granite paving
- 8 Yorkstone paving
- 9 Dark granite paving
