

13.5 Street to Podium Access

STREET TO PODIUM

The ease and safe pedestrian movement is critical for the crowd management of large crowds to and from the Stadium and to provide a highly visible and inviting means to move from the street to the square and podium.

The following outlines each of the stair and lift areas:

- 1 - High Road
 - Street level to North Podium (Stairs and lift)
 - Concrete steps to work with the facades and balustrade design
- 2 - Street level to South Podium (Stairs and lift)
 - Stone steps that fit with the character of the buildings and to integrate with the pavement
- 3 - Tottenham Experience to South Podium (Stairs)
 - Stone steps that fit with the character of the buildings and to integrate with the pavement
- 4 - High road/Park Lane corner
 - Street level to South Podium (Stairs and lift)
 - Stone steps that fit with the character of the buildings and to integrate with the pavement
- 5 - Park Lane
 - Hotel place and drop-off (stairs and lift)
 - Stone steps that fit with the character of the buildings and to integrate with the pavement
- 6 - Park Lane Residential (stairs and lift)
 - Stone steps that fit with the character of the buildings and to integrate with the pavement
- 7+8 - Worcester Avenue (stairs and lift)
 - Concrete steps to work with the facades and balustrade design

- STAIRS
- LIFTS
- PODIUM LEVEL

TYPICAL STAIRS TREATMENT

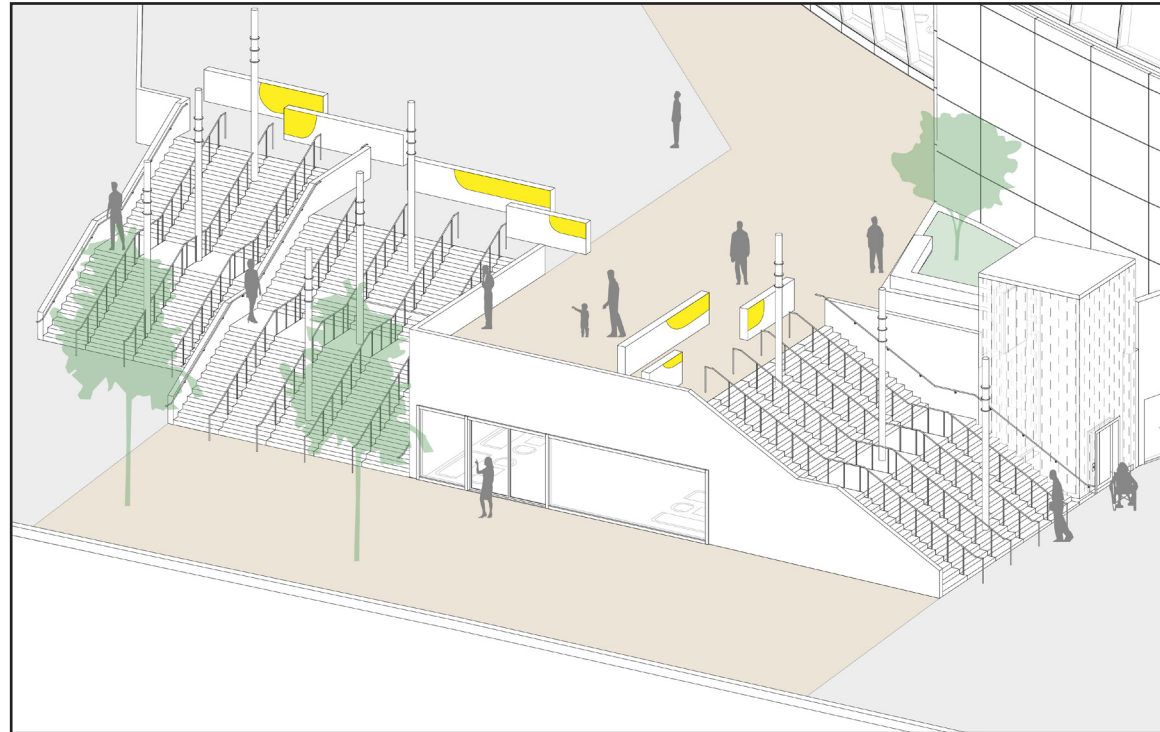

The stairs not only provide a means of access from the street to podium. Each stair location has a unique character to provide a range of experiences that responds to the adjacent buildings; its location in relation to the street and the sense of arrival and the type of trees and planting to create a variety of landscapes.

Where possible the large external stairs have been broken down into smaller elements (less than 3m in width), which reduces the extent of hand railing required for crowd movement and produces a more aesthetically pleasant environment. This type of stair needs to have a suitable separation between adjoining stair blocks to meet crowd safety requirements and these zones have been landscaped to enhance the overall setting.

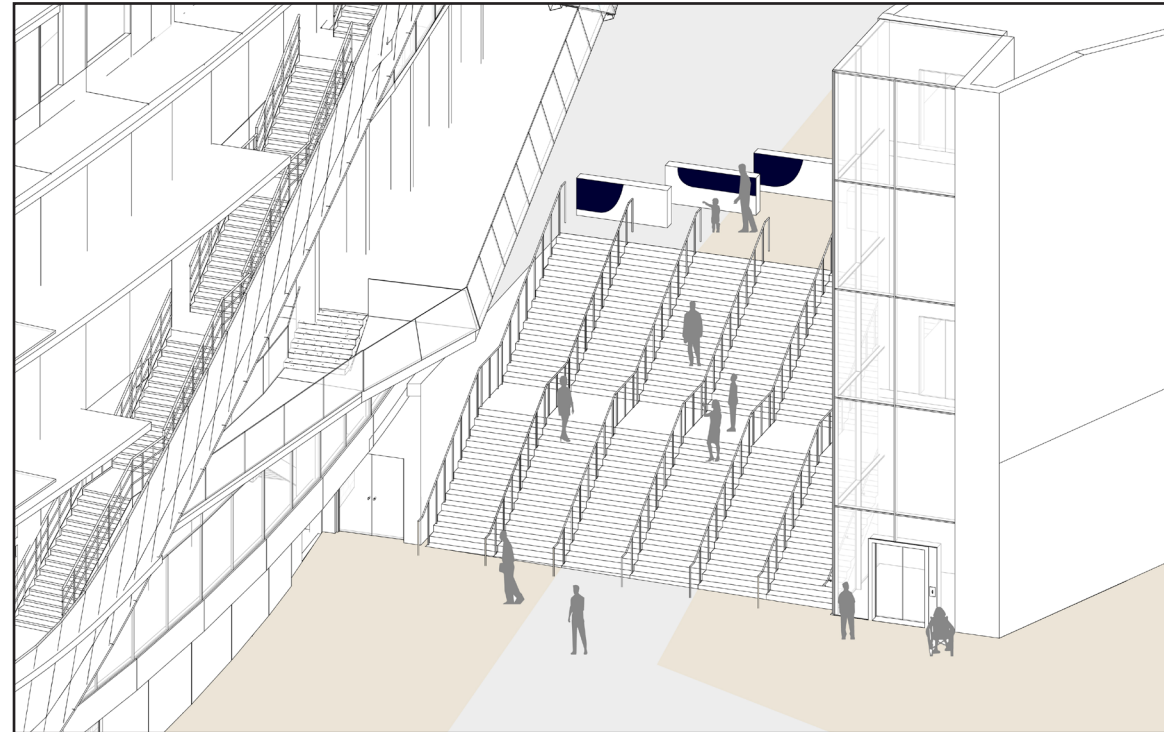

KEY

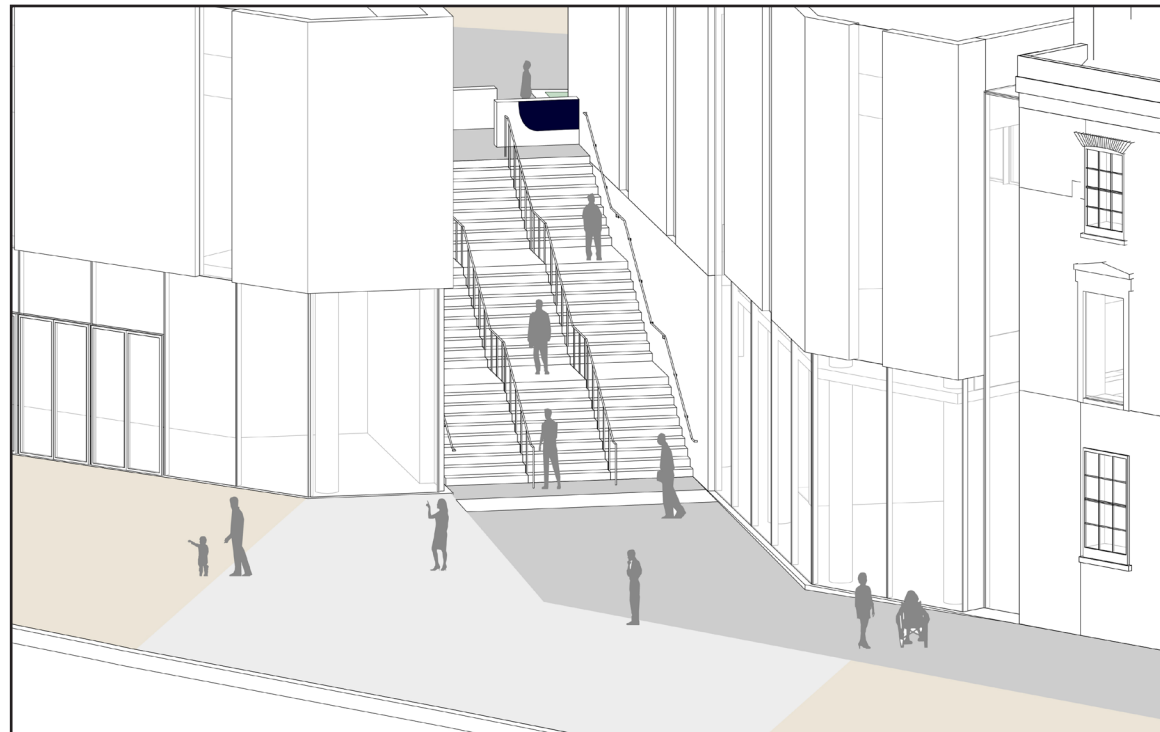

- 1 Steps: 300 tread/ 170mm riser
- 2 Tactile Paving
- 3 Handrails: Steel freestanding and wall mounted
- 4 Sloping Planter: Precast Concrete, with inlay face for branding and art opportunity
- 5 Tree copse and understorey planting
- 6 Lighting columns to meet safety standards

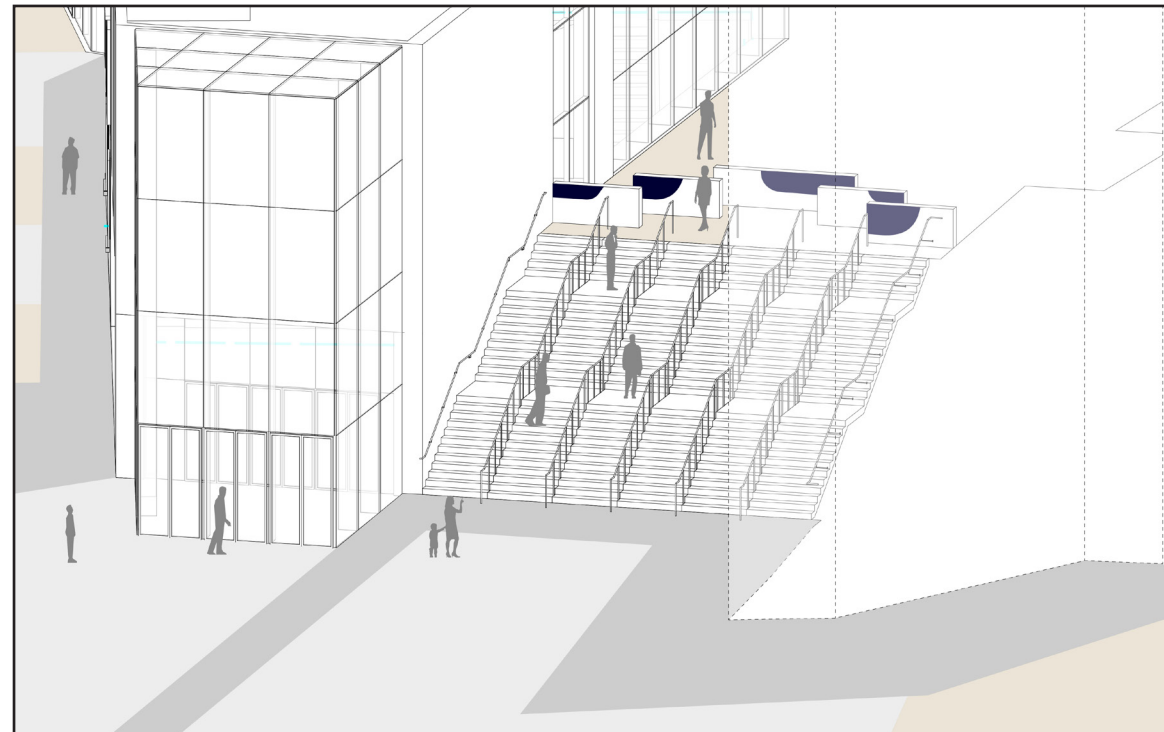

1 - HIGH ROAD - NORTH PODIUM STAIRS AND LIFT

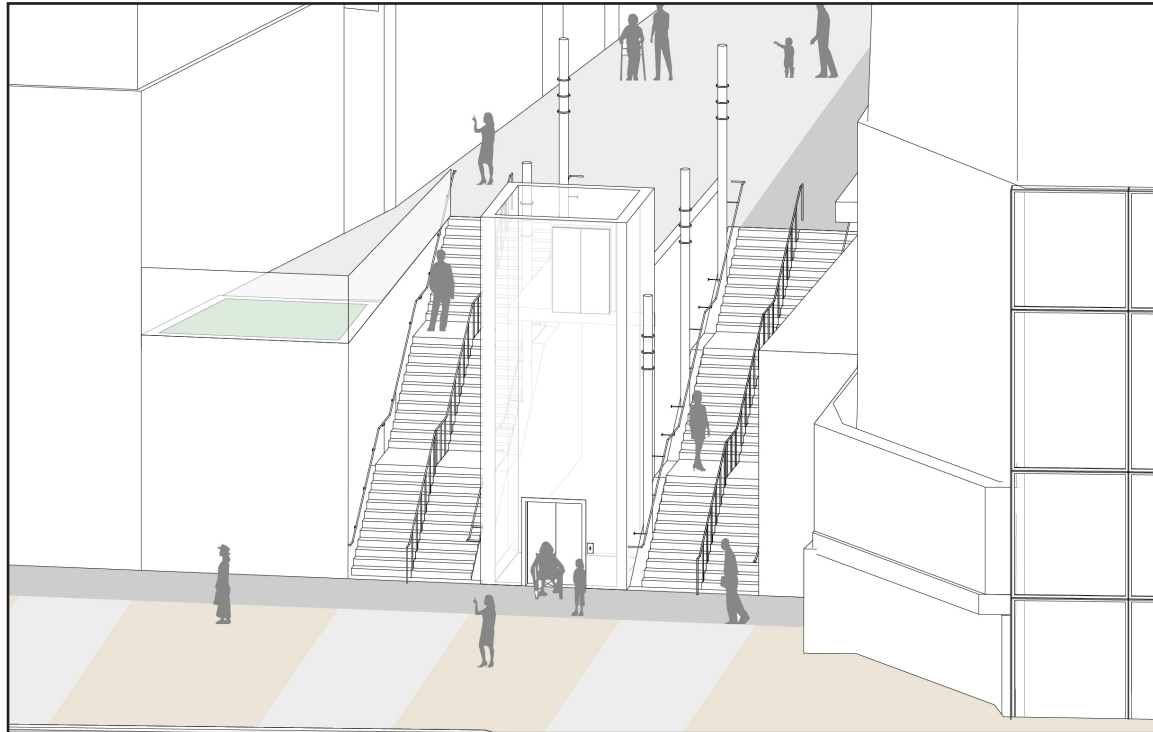

2 - HIGH ROAD - SOUTH PODIUM STAIRS AND LIFT

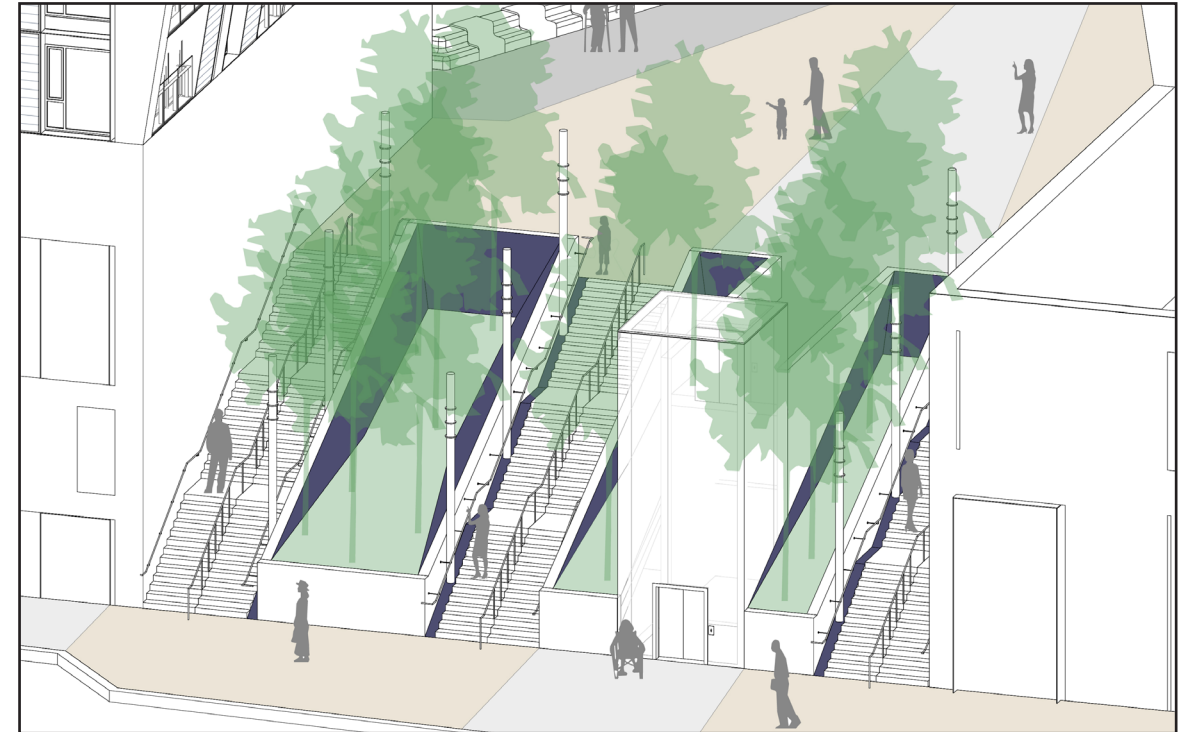

3 - HIGH ROAD - SOUTH PODIUM TOTTENHAM EXPERIENCE STAIRS

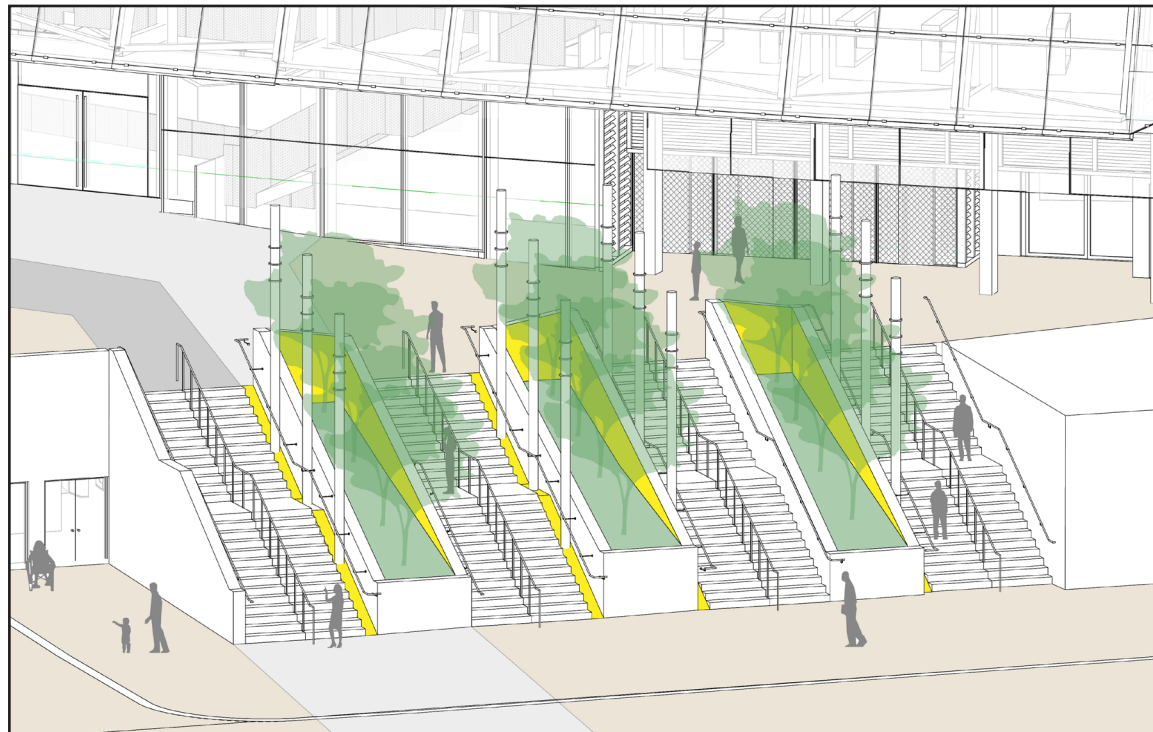

4 - HIGH ROAD/PARK LANE PLAZA STAIRS

5 - PARK LANE/HOTEL STAIRS AND LIFT

6 - PARK LANE - STAIRS AND LIFT

7 - WORCESTER AVENUE - SOUTH PODIUM STAIRS AND LIFT

8 - WORCESTER AVENUE - NORTH PODIUM STAIRS AND LIFT
