

GROUND EXPLORATIONS LTD.

BOREHOLE NO. 7

TQ39SW 380

Contract Name Northumberland Park

Report No. 5286/APB/LAB

Client C.J. Pell, Frischmann and Partners,

Site Address

Address 4 Manchester Square,

Northumberland Park Primary School,

London W1M 6ED.

Worcester Avenue,

Haringey, London, N.17.

Standing Water Level 5'0"

Method of Boring Shell auger

Water Struck 5'0"

Diameter 6 inches

Ground Level 34.94

Start 20.4.71. Finish 21.4.71.

Remarks

JARS			CORES		BULK	
6901 2'6"	6919 44'6"		6908 15'6"		6903 5'0"

Appendix F: Preliminary Risk Assessment

Appendix F Preliminary Risk Assessment

Source			Pathway	Hazard to Receptor		Risk assessment (following CIRIA C552)			Description of source (bold text). Comment on hazard realisation (normal text)
Origin	Contaminants of concern	Zone affected				Consequence	Probability	Risk	
Made Ground (Demolition debris, former & current industrial land uses)	Heavy metals, other inorganic contaminants, asbestos, total petroleum hydrocarbons (TPH), polycyclic aromatic hydrocarbons (PAHs), carbon dioxide, methane, semi-volatile and volatile organic compounds (SVOC & VOC), PCB oils.	Site Wide							Up to 3.5m of Made Ground (average 2m) expected. Made Ground likely to comprise clayey SAND and GRAVEL. Gravels typically comprise of brick, flint, clinker, ash, chalk, glass, slag and glass with rare organic material i.e. wood. Numerous historical industrial and land uses across site including steelworks, steelworks, car workshops & engineering works etc. SOILTECHNICS ground investigation report 2005 (ref 3) recorded elevated concentrations of lead (<1100mg/kg), Benzo(a)pyrene (<9.8mg/kg) and PAH (up to 120mg/kg) in Made Ground. Nature/extent of contamination is not fully known/ proven but likely to be widespread and with gross contamination present in localised areas.
			Soil and dust ingestion, dermal contact, vapour inhalation (outdoor air)	Health impact to construction workers	Medium	Low-likelihood		Moderate/Low	Potential for exposure during excavations/earthworks. Standard Health & Safety precautions likely to be used by workers.
			Soil and dust ingestion, dermal contact, vapour (outdoor & indoor air)	Health impact to site users and visitors	Medium	Low-likelihood		Moderate/Low	Accidental exposure prevented due to site being currently covered in hard standing. Potential for uncontrolled exposure in areas of soft landscape in the future. Potential for uncontrolled exposure to dust etc during earthworks. Appropriate investigation and risk assessment/mitigation in the final development is likely.
			Soil and dust ingestion, dermal contact.	Health impact to residents of the adjacent properties	Medium	Low-likelihood		Moderate/Low	Potential for contamination to migrate onto adjacent sites during any earthworks with resulting uncontrolled exposure. Residential, Primary and Secondary Schools, Sports Centre and Community Centre located adjacent to the site boundary. Standard good construction practice likely to inhibit dust generation.
			Migration via permeable strata	Degradation of water quality [Kempton Park Gravels Minor Aquifer]	Medium	Low-likelihood		Moderate/Low	Leachate results from SOILTECHNICS report (2005) suggest contaminants are not highly mobile. Localised deposits of silt overlie gravels but unlikely to provide effective barrier to downward migration of

Source			Pathway	Hazard to Receptor	Risk assessment (following CIRIA C552)			Description of source (bold text). Comment on hazard realisation (normal text)
Origin	Contaminants of concern	Zone affected			Consequence	Probability	Risk	
								any mobile contamination. Infiltration significantly inhibited by present hardstanding. Final development also likely to be mostly hardstanding. Potential for infiltration during earthworks. Groundwater likely to be degraded by history of commercial/ industrial use. Expected at shallow depth (~2-3.5m). Flow direction unknown No local surface water limiting potential for baseflow.
			Migration via permeable strata	Degradation of water quality [Woodwich and Reading Beds - Minor Aquifer. Chalk Major Aquifer]	Medium	Unlikely	Low	Significant thickness of low permeability London Clay overlying the deeper aquifers, limiting vertical migration. Infiltration will be significantly reduced in final development. Potential for infiltration during earthworks. Majority of site lies within SPZ II. Nearest abstraction over 285m NE (rubber: general cooling).
			Direct contact/ aggressive attack/ below ground structures	Permeation of water supply pipework	Medium	Low-likelihood	Moderate/ Low risk	Potential for direct contact. Appropriate investigation/ design likely in any new buildings. Previous investigation results show there is potential for an aggressive ground environment.
			Root uptake	Detrimental effects (stunted growth, die-back) on plant life.	Minor	Low-likelihood	Very Low	Limited vegetation onsite did not show any adverse effects. Potential for uptake in any areas of public open space (<5% of future development) or neighbouring gardens.
	Methane, carbon dioxide, VOC vapours		Gas/vapour migration via permeable strata and accumulation in enclosed spaces	Explosion, fire, asphyxiation hazard to construction workers, site end users, users of adjacent buildings	Severe	Low-likelihood	Moderate	SOILTECHNICS have undertaken ground gas monitoring at the site in 2005. Recorded maximum concentrations of methane (24.5%) and carbon dioxide (12%). Source of methane unknown. Further monitoring proposed but results have not been obtained. Potential for significant generation / migration of gases associated with decomposition of any organic matter in Made Ground and presence of hydrocarbons. Unprotected below ground/ enclose spaces would enable accumulation of gas to hazardous concentrations.
Former Fuel Station	PAHs, MTBE, heavy metals, VOCs, SVOC, hydrocarbons (TPH, BTEX), methane and carbon dioxide	On site (to the east fronting High Road)						Former fuel station located onsite. No visual evidence of leakage. SOILTECHNICS report noted slight hydrocarbon odour in Kempton Park Gravels. SOIL TECHNICS indicated former station's tanks and fuel lines have been foam filled.. Location of tanks indicated on drawings but invert levels unknown. Nature/extent of contamination

Source			Pathway	Hazard to Receptor	Risk assessment (following CRIA CS52)			Description of source (bold text). Comment on hazard realisation (normal text)
Origin	Contaminants of concern	Zone affected			Consequence	Probability	Risk	
	gases.							is not fully known/ proven.
			Soil and dust ingestion, dermal contact, vapour inhalation (outdoor air)	Health impact to construction workers	Medium	Low-likelihood	Moderate/Low	Potential for exposure during excavations/earthworks. Standard Health & Safety precautions likely to be used by workers.
			Soil and dust ingestion, dermal contact, vapour (outdoor & indoor air)	Health impact to site users and visitors	Medium	Low likelihood	Moderate/Low	Accidental exposure prevented due to site being currently covered in hard standing. Potential for uncontrolled exposure in areas of soft landscape in the future. Potential for uncontrolled exposure to dust etc during earthworks. Appropriate investigation and risk assessment/mitigation in the final development is likely.
			Soil and dust ingestion, dermal contact.	Health impact to residents of the adjacent properties	Medium	Low-likelihood	Moderate/Low	Potential for contamination to migrate onto adjacent sites during earthworks with resulting uncontrolled exposure. Residential and retail properties located on western boundary of site. Standard good construction practice likely to inhibit dust generation.
			Migration via permeable strata	Degradation of water quality [Kempston Park Gravels Minor Aquifer]	Medium	Low likelihood	Moderate/Low	Leachate results from SOILTECHNICS report (ref 3) suggest contaminants are not highly mobile. Localised deposits of silt overlie gravels but unlikely to provide effective barrier to downward migration of any mobile contamination. Infiltration significantly inhibited by present hardstanding. Final development also likely to be mostly hardstanding. Potential for infiltration during earthworks. Groundwater likely to be degraded by history of commercial/ industrial use. Expected at shallow depth (~2-3.5m). Flow direction unknown No local surface water limiting potential for baseflow.
			Migration via permeable strata	Degradation of water quality [Woodwich and Reading Beds – Minor Aquifer, Chalk – Major Aquifer]	Medium	Unlikely	Low	Likely to be a significant thickness of low permeability London clay overlying the deeper aquifers, inhibiting vertical migration. Infiltration will be significantly reduced in final development. Potential for infiltration during earthworks. Former fuel station does not lie within SPZ II. Nearest abstraction over 285m NE (rubber; general cooling).

Source			Pathway	Hazard to Receptor	Risk assessment (following CRIA CS52)			Description of source (bold text). Comment on hazard realisation (normal text)
Origin	Contaminants of concern	Zone affected			Consequence	Probability	Risk	
			Direct contact, aggressive attack/ below ground structures	Permeation of water supply pipework	Medium	Low-likelihood	Moderate/ Low risk	Potential for direct contact. Appropriate investigation/ design likely in any new buildings. Previous investigation results show there is potential for an aggressive ground environment.
			Root uptake	Detrimental effects (stunted growth, die-back) on plant life.	Minor	Low-likelihood	Very Low	Limited vegetation onsite did not show any adverse effects. Potential for uptake in any areas of public open space (<5% of future development) or neighbouring gardens.
	Methane, carbon dioxide, VOC vapours		Gas/vapour migration via permeable strata and accumulation in enclosed spaces	Explosion, fire, asphyxiation hazard to construction workers, site end users, users of adjacent buildings	Severe	Low-likelihood	Moderate	No gas monitoring carried out in vicinity of former fuel station. Potential for localised generation/ migration of gases associated with decomposition/ breakdown of hydrocarbons.
Tanks (including Diesel, Unknown Storage)	Heavy metals, other inorganic contaminants, total petroleum hydrocarbons (TPH), polycyclic aromatic hydrocarbons (PAHs), carbon dioxide, methane, semi-volatile and volatile organic compounds (SVOC & VOC), PCB oils and solvents.	Site Wide						Diesel tank and another tank of unknown content identified onsite. No visual/ olfactory evidence of leakage. Contents of two further tanks and two potential tanks identified by Envirocheck report unknown. Tanks not observed during site walkover. Nature/extent of contamination is not fully known/ proven but likely to be relatively localised..
			Soil and dust ingestion, dermal contact, vapour inhalation (outdoor air)	Health impact to construction workers	Medium	Low-likelihood	Moderate/ Low	Potential for exposure during excavations/earthworks. Standard Health & Safety precautions likely to be used by workers.
			Soil and dust ingestion, dermal contact, vapour (outdoor & indoor air)	Health impact to site users and visitors	Medium	Unlikely	Low	Accidental exposure prevented due to site being currently covered in hard standing. Potential for uncontrolled exposure in areas of soft landscape in the future. Potential for uncontrolled exposure to dust etc during earthworks. Appropriate investigation and risk assessment/mitigation in the final development is likely.

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940's. In 1954 the 1:2,500 scale was adopted for mapping urban areas and by 1966 it covered the whole of the country. The maps were contained in the published parts of the Ordnance Survey's 'The History of the County of Essex' series. The maps shown are the original maps as they appeared in the published parts. Below 1933 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant discrepancies in outlying areas.

Supply of Unpublished Survey Information

Published 1974

Source map scale - 1:1,250

SUB maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more of a 'work-in-progress' plan as they showed updates of individual features on a map. These maps were unpublished, and they do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

Large-Scale National Grid Data

Published 1991

Source map scale - 1:1,250

Large Scale National Grid Data' superseded SIM cards (Ordinance Survey's Survey of Information on Microfilm) in 1992, and continued to be produced until 1994. These maps were the forerunners of digital mapping and so provide information on house and roads, but tend to show less detail than modern maps such as those produced at both 1:2,500 and 1:1,250 scales.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m
Historical Building Plans Information					
Areas Cleared Due To Enemy Action					
Above Ground Fuel Tanks (100m)				n/a	n/a
Asbestos (100m)				n/a	n/a
Benzene/Benzole/Naphtha, Naphthalene/Kerosene (100m)				n/a	n/a
Electricity Generation (100m)				n/a	n/a
Electricity Sub-Station (100m)				n/a	n/a
Gas Industry (100m)				n/a	n/a
Gas Storage (100m)				n/a	n/a
Gas Use (100m)				n/a	n/a
Oil Industry (100m)				n/a	n/a
Oil Storage (100m)				n/a	n/a
Oil Use (100m)				n/a	n/a
Paint based Oils (100m)				n/a	n/a
Paraffin (100m)				n/a	n/a
Petrol and Diesel Industry (100m)				n/a	n/a
Petrol and Diesel Storage (100m)				n/a	n/a
Petrol and Diesel Use (100m)				n/a	n/a
Potential Fuel Gas (100m)				n/a	n/a
Potential Fuel Oil (100m)				n/a	n/a
Potential Fuel Use (100m)				n/a	n/a
Potential Petrol and Diesel (100m)				n/a	n/a
Potential Tanks (100m)				n/a	n/a
Potentially Fuel-related Tanks (100m)				n/a	n/a
Underground Fuel Tanks (100m)				n/a	n/a
Historical Land Use Information					
Former Marshes					
Historical Flood Liabilities					
Potentially Contaminative Industrial Uses (Past Land Use)	pg 1	1	9	6	29
Potentially Infilled Land (Non-Water)	pg 3		1		3
Potentially Infilled Land (Water)	pg 3		3	5	27

Data Type	Page Number	On Site	0 to 250m	251 to 500m	501 to 1000m
Historical Tanks and Energy Facilities					
Electrical Sub Station Facilities (100m)	pg 6	2	5	n/a	n/a
Electricity Industry Facilities (100m)				n/a	n/a
Gas Industry Facilities (100m)				n/a	n/a
Gas Monitoring Facilities (100m)				n/a	n/a
Miscellaneous Power Facilities (100m)				n/a	n/a
Oil Industry Facilities (100m)				n/a	n/a
Petroleum Storage Facilities (100m)				n/a	n/a
Potential Tanks (100m)	pg 6	4	1	n/a	n/a
Tanks (100m)	pg 6	2	1	n/a	n/a

Map ID	Details	Quadrant Reference (Compass Direction)	Estimated Distance From Site	Contact	NGR
1	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1992	A13SW (S)	0	1	533965 191079
2	Potentially Contaminative Industrial Uses (Past Land Use) Use: Brewing & malting Date of Mapping: 1876	A13NW (NW)	76	1	533822 191520
3	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1896 - 1952	A13NW (NW)	134	1	533752 191446
4	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1992	A18SW (NW)	136	1	533864 191615
5	Potentially Contaminative Industrial Uses (Past Land Use) Use: Clay bricks & tiles [manufacture] Date of Mapping: 1876	A13SW (W)	143	1	533750 191190
6	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1946 - 1992	A13NE (NE)	147	1	534237 191559
7	Potentially Contaminative Industrial Uses (Past Land Use) Use: Road haulage Date of Mapping: 1992	A8NW (SW)	177	1	533855 190892
8	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1896 - 1992	A13SW (W)	203	1	533692 191241
9	Potentially Contaminative Industrial Uses (Past Land Use) Use: Brewing & malting Date of Mapping: 1952	A8NW (S)	210	1	533997 190848
10	Potentially Contaminative Industrial Uses (Past Land Use) Use: Brewing & malting Date of Mapping: 1896	A8NW (S)	220	1	533970 190831
11	Potentially Contaminative Industrial Uses (Past Land Use) Use: Machinery, engines, building and general industrial [manufacture] Date of Mapping: 1920	A14NW (NE)	273	1	534389 191466
12	Potentially Contaminative Industrial Uses (Past Land Use) Use: Road haulage Date of Mapping: 1992	A8NE (S)	312	1	534032 190749
13	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1952 - 1992	A18SW (NW)	338	1	533684 191751
14	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1938 - 1952	A17SE (NW)	350	1	533689 191754
15	Potentially Contaminative Industrial Uses (Past Land Use) Use: Cemetery or Graveyard Date of Mapping: 1876 - 1992	A12SE (W)	377	1	533521 191239
16	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1938	A17SE (NW)	466	1	533500 191741
17	Potentially Contaminative Industrial Uses (Past Land Use) Use: Clay bricks & tiles [manufacture] Date of Mapping: 1920	A17SE (NW)	516	1	533635 191930
18	Potentially Contaminative Industrial Uses (Past Land Use) Use: Sawmilling, planing & impregnation [i.e. treatment of timber] Date of Mapping: 1952	A17SE (NW)	550	1	533360 191636
19	Potentially Contaminative Industrial Uses (Past Land Use) Use: Spirit distilling & compounding Date of Mapping: 1938	A17SE (NW)	593	1	533486 191918
20	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1896 - 1990	A8SW (S)	628	1	533744 190453
21	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1896 - 1992	A18NW (N)	653	1	533829 192130

Map ID	Details	Quadrant Reference (Compass Direction)	Estimated Distance From Site	Contact	NGR
22	Potentially Contaminative Industrial Uses (Past Land Use) Use: Hospitals Date of Mapping: 1920 - 1992	A17NE (NW)	665	1	533661 192106
23	Potentially Contaminative Industrial Uses (Past Land Use) Use: Clay bricks & tiles [manufacture] Date of Mapping: 1881	A17NE (N)	676	1	533672 192121
24	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1920 - 1992	A14SE (E)	704	1	534858 191031
25	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1876 - 1990	A14SE (E)	720	1	534848 190937
26	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1876 - 1990	A14SE (E)	723	1	534878 191057
27	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1992	A8SW (S)	749	1	533958 190307
28	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1990	A14SE (E)	776	1	534912 191081
29	Potentially Contaminative Industrial Uses (Past Land Use) Use: Disturbed Ground Date of Mapping: 1952	A17SW (W)	783	1	533118 191627
30	Potentially Contaminative Industrial Uses (Past Land Use) Use: Sawmilling, planing & impregnation [i.e. treatment of timber] Date of Mapping: 1920	A18NE (N)	789	1	534082 192266
31	Potentially Contaminative Industrial Uses (Past Land Use) Use: Rubber natural products manufacture Date of Mapping: 1876 - 1896	A8SE (S)	789	1	534019 190266
32	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1992	A9SW (SE)	806	1	534567 190379
33	Potentially Contaminative Industrial Uses (Past Land Use) Use: Gas manufacture & distribution Date of Mapping: 1876 - 1952	A19SE (NE)	832	1	534892 191775
34	Potentially Contaminative Industrial Uses (Past Land Use) Use: Mineral products non-metallic [inc. abrasives & asbestos] [miscellaneous manufacture] Date of Mapping: 1920 - 1952	A9NE (SE)	846	1	534947 190817
35	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1990	A9NE (SE)	849	1	534953 190821
36	Potentially Contaminative Industrial Uses (Past Land Use) Use: Road haulage Date of Mapping: 1990	A9NE (SE)	854	1	534960 190835
37	Potentially Contaminative Industrial Uses (Past Land Use) Use: Leather tanning & dressing Date of Mapping: 1952	A15NW (E)	900	1	535036 191270
38	Potentially Contaminative Industrial Uses (Past Land Use) Use: Oil, petroleum & gas refining & storage Date of Mapping: 1990	A19SE (NE)	931	1	534946 191897
39	Potentially Contaminative Industrial Uses (Past Land Use) Use: Clay bricks & tiles [manufacture] Date of Mapping: 1896	A17NW (NW)	931	1	533295 192199
40	Potentially Contaminative Industrial Uses (Past Land Use) Use: Road haulage Date of Mapping: 1992	A4NW (S)	931	1	534420 190173
41	Potentially Contaminative Industrial Uses (Past Land Use) Use: Railways Date of Mapping: 1881 - 1990	A20SW (E)	945	1	535038 191684

Map ID	Details	Quadrant Reference (Compass Direction)	Estimated Distance From Site	Contact	NGR
42	Potentially Contaminative Industrial Uses (Past Land Use) Use: Machinery: engines, building and general industrial [manufacture] Date of Mapping: 1946 - 1952	A20SW (E)	954	1	535048 191677
43	Potentially Contaminative Industrial Uses (Past Land Use) Use: Natural and man-made textile manufacture and products Date of Mapping: 1938 - 1952	A22SE (N)	965	1	533594 192401
44	Potentially Contaminative Industrial Uses (Past Land Use) Use: Refuse disposal Date of Mapping: 1920 - 1952	A4NW (S)	971	1	534379 190120
45	Potentially Contaminative Industrial Uses (Past Land Use) Use: Factory or works - use not specified Date of Mapping: 1992	A19NE (NE)	990	1	534810 192182
46	Potentially Infilled Land (Non-Water) Use: Unknown Filled Ground (Pit, quarry etc) Date of Mapping: 1992	A13SW (W)	143	1	533750 191190
47	Potentially Infilled Land (Non-Water) Use: Unknown Filled Ground (Pit, quarry etc) Date of Mapping: 1992	A17SE (NW)	516	1	533635 191930
48	Potentially Infilled Land (Non-Water) Use: Unknown Filled Ground (Pit, quarry etc) Date of Mapping: 1992	A17NE (N)	676	1	533672 192121
49	Potentially Infilled Land (Non-Water) Use: Unknown Filled Ground (Pit, quarry etc) Date of Mapping: 1992	A17NW (NW)	931	1	533295 192199
50	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A13SE (SE)	3	1	534134 191120
51	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A13NE (NE)	4	1	534122 191341
52	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A14SW (E)	231	1	534349 191267
53	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A14NW (E)	289	1	534406 191296
54	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A14SW (E)	309	1	534429 191260
55	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A8NE (S)	331	1	534185 190734
56	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A14SW (E)	377	1	534497 191266
57	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A12SE (W)	399	1	533514 191113
58	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1952	A7NE (SW)	513	1	533524 190735
59	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1896	A8SW (S)	582	1	533915 190472
60	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1952	A7NE (SW)	611	1	533519 190598
61	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A14NE (E)	643	1	534759 191425
62	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1896	A12NW (W)	650	1	533237 191502

Map ID	Details	Quadrant Reference (Compass Direction)	Estimated Distance From Site	Contact	NGR
63	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A14NE (E)	659	1	534774 191468
64	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A14NE (E)	733	1	534848 191461
65	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A17SW (NW)	737	1	533167 191637
66	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1896	A14SE (E)	807	1	534944 191047
67	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A17SW (W)	810	1	533091 191632
68	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1920	A12SW (W)	819	1	533091 191123
69	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1946	A17SW (NW)	823	1	533091 191692
70	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A19SE (NE)	824	1	534824 191898
71	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1896	A9NE (SE)	828	1	534930 190791
72	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1946	A14NE (E)	842	1	534987 191346
73	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1896	A9SE (SE)	879	1	534723 190406
74	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1952	A9NE (SE)	882	1	534982 190810
75	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1896	A7NW (SW)	898	1	533096 190699
76	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1952	A16SE (W)	914	1	532986 191638
77	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1881	A19NE (NE)	927	1	534876 192006
78	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1920	A23SW (N)	940	1	533676 192396
79	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1876	A19NE (NE)	950	1	534909 191999
80	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1946	A7SW (SW)	951	1	533115 190556
81	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1946	A20SW (E)	955	1	535046 191690
82	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1946	A16SE (W)	957	1	532945 191652
83	Potentially Infilled Land (Water) Use: Unknown Filled Ground (Pond, marsh, river, stream, dock etc) Date of Mapping: 1920	A24SW (NE)	963	1	534476 192369

Historical Building Plans Information

This data set contains potentially contaminative features such as asbestos, petrol, oil and tanks captured from Historical Building Plans. The Historical Building Plans were produced by the London-based firm Charles E. Goad Ltd. as fire insurance plans, dating back to 1885. The firm ceased production of fire insurance plans in 1970. Most of the important towns and cities of the British Isles are covered. Historical Building Plans are usually at the scales of 1:480 (1 inch to 40 feet) for the British Isles. They were updated every 5-6 years by means of revision sheets designed to be pasted on to the original plans.

It should be noted that Historical Building Plans are only available for certain major towns and cities and in some cases there may only be partial coverage of the search area. It cannot therefore be assumed that the absence of responses under the Historical Building Plans section of this report indicates that no hazards exist. Please check the Historical Building Plans Map List table in the Historical Map List section of this report to establish if Historical Building Plans are available for this search area.

Historical Land Use Information

Landmark's Historical Land Use Data is the result of combined analysis of historical map data captured at 1:10,560 and 1:10,000. A unique comprehensive database of Historic Land Use from the 1840's to 1996 it includes 67 different types of potentially contaminated past industrial land use. This entailed analysing over 60,000 maps and is drawn from at least four, and up to six historical map editions. In addition a seventh layer was also created, known as the land use layer, containing areas of infilled land which are plotted via comparison between two or more map editions.

Historical Tanks and Energy Facilities

In addition to HLU, additional analysis uncovered some of the most dangerous sources of contamination (past and present tanks, petrol storage, oil, gas, electricity, miscellaneous facilities). This data set covers over 390,000 Historical Tanks and Energy facilities in Great Britain and was captured from post war 1:2500 and 1:1250 Ordnance Survey historical mapping covering a period from 1943 to 1996.

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the state adopted for England, Wales and Scotland in the 1940's. In 1954 the 1:250,000 scale was adopted for mapping urban areas, these maps were used to update the 1:10,560 maps. The Public Record Office is a government body that holds the records of the country, including maps, and is the main source of information on the history of the country or group of counties, giving the to significant information in existing areas. In the late 1940's a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unaltered - with all railway lines and other strategic sites removed. These maps were already overlaid with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Ordnance Survey Plan

Published 1952

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940's. In 1954 the 1:10,560 scale was adopted for mapping urban areas, these maps were used to update the 1:50,000 maps. The 1:10,560 scale maps are a series of maps covering the country, each map covers a 100 square kilometre area. The maps are produced by a group of counties, giving rise to significant inaccuracies in certain areas. In the late 1940's a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unaltered - with all military camps and other strategic sites removed. These maps were initially overlaid with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.
