Site

The Lime trees T1 & T2, as marked on the plan and seen in the photograph, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Re-pollard two lime trees (T1 & T2) back to previous most recent pollard points to allow light into surrounding gardens.

Issues

I hold no objections to the proposed reasonable repeat works.

The specification is within good arboricultural practice and husbandry.

Limes generally respond well to such reductions and recover their crowns over a short period of time.

Recommendation

No Objection
