

PROTECTED TREE REPORT (TREE WORKS)

Haringey Council, L4,
Alexandra House, Station
Road N22 7TY

Application number	HGY/2023/1920
Application type	Conservation Area Notification
Site Address:	54 Perth Road, Hornsey, London, N4 3HB
Proposal	We are removing our shed and laying a new patio at the back of our garden. When the original shed was removed we found two small trees growing out of a wall behind the shed. It makes sense to remove these trees, as the fact that they are growing out of wall suggest they will become unstable and dangerous and may also damage a neighbour's structure (built adjacent to the wall the trees are growing out of. Our builders were unaware that we needed permission to remove these trees and has already taken them out of the wall. However, we felt it best to notify you so you understood the situation. Please see photos to show precariousness of trees and reason to remove.

RECOMMENDATION:	No Objection	
Application date	17/07/2023	
Tree Inspector	DM	Date: 16 th August 2023

Site

The self-set two sap trees, as marked on the plan and seen in the photographs, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Stroud Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

We are removing our shed and laying a new patio at the back of our garden. When the original shed was removed we found two small trees growing out of a wall behind the shed. It makes sense to remove these trees, as the fact that they are growing out of wall suggest they will become unstable and dangerous and may also damage a neighbour's structure (built adjacent to the wall the trees are growing out of).

Our builders were unaware that we needed permission to remove these trees and has already taken them out of the wall. However, we felt it best to notify you so you understood the situation.

Please see photos to show precariousness of trees and reason to remove.

Issues

I hold no retrospective objections to the removal of the low grade self-set saps.

It is evident that they would have caused future direct damage to the wall.

Recommendation

No Objection
