Site

The Magnolia tree T1, as marked on the plan, is situated in the rear garden of the property. It is publicly visible between the properties from Stanhope Gardens.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Highgate Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T7 Magnolia, crown reduce by 1m.

Cyclical maintenance.

Issues

I hold no objections to the proposed pruning works.

There is no record that the Magnolia has been reduced before. No photograph has been submitted however, images from Google Street view shows that the Magnolia is a maiden tree.

The tree is close to the structure and hardstand area.

Magnolias generally reduce and respond well to reductions.

The specification is within good arboricultural practice and husbandry.

Recommendation

No Objection
