| <b>Site Address:</b>      | 1 Belz Drive, Nelson Road, Tottenham, London, N15 4FS                                                                                                                                                                                                                                                                                          |
| <b>Proposal</b>           | <p>Sycamore<br/>Front garden ( left of house)<br/>Multi stem tree with bark disfunction and included bark at low level, carrying dead wood.<br/>Reduce height by up to 4 meters and prune lateral branches to form a more contained crown to contain crown and root activity and to manage a duty of care.<br/>Remove dead/dying branches.</p> |

|                         |                     |                                              |
|-------------------------|---------------------|----------------------------------------------|
| <b>RECOMMENDATION:</b>  | <b>No Objection</b> |                                              |
| <b>Application date</b> | 16/08/2023          |                                              |
| <b>Tree Inspector</b>   | DM                  | <b>Date:</b> 13 <sup>th</sup> September 2023 |

## **Site**

The Sycamore tree, as described above and seen in the photograph, is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Tottenham Central Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

## **Proposal**

Tree works proposed.

Sycamore

Front garden ( left of house)

Multi stem tree with bark disfunction and included bark at low level, carrying dead wood.

Reduce height by up to 4 meters and prune lateral branches to form a more contained crown to contain crown and root activity and to manage a duty of care.

Remove dead/dying branches.

## **Issues**

I hold no objections to the proposed pruning works and concur with the observations above.

The Sycamore has tight included forks and sparse crown.

The reduction will reduce the outside influences on the compression forks and the tree should restore its crown over time.

## **Recommendation**

**No Objection**
