Subject: RE: HGY/2023/2224

Please find the reasoning for the fells below,

T6 - Meripilus at base

G9 - Self-sown (ash mainly) that are easy to remove now before they get too big

T12 - Low quality tree with fruiting bodies at base

T14 - Low quality tree close to neighbouring property

Also please note that we are changing the spec to T3 small Sycamore, from Remove regrowth to a Fell as it has been planted to close to the building and therefore will have no future in that position (picture attached).

Kind regards

Clare Bailey
