Site

The Horse Chestnut tree T1, as marked on the plan and seen in the photograph, is situated in the grounds of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

Chestnut tree in communal area to crown reduce to old pruning points (approx 30%).

Issues

I hold no objections to the reasonable repeat proposed pruning works to prune back to the most recent previous reduction points.

The 30% reduction is the equivalent of an overall reduction of 2-3m.

The specification is within good arboricultural practice and husbandry.

The reduction will keep the tree in scale to its surroundings.

Chestnuts with good vigour and vitality generally respond well to such reductions.

Recommendation

No Objection
