RECOMMENDATION:	Objection	
Application date	24/08/2023	
Tree Inspector	DM	Date: 31 st October 2023

Site

The Cypress tree T1, as marked on the plan and seen in the photographs, is situated in the front garden of the property. It is publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works (30/10/2023 at approximately 11.20am).

The tree is protected by a Tree Preservation Order (TPO)

Proposal

Tree works proposed.

T1 Cypress: Fell to ground level

Reasons: Poor form and overgrown shape/ Ivy damage, unsuitable for pruning due to species, replanting with broadleaf specimen. Unsuitable at maturity poor location.

Issues

From an arboricultural point of view, I object to the proposal felling of the above tree.

A site visit revealed the mature tree in a reasonable and fair condition at the time of inspection.

The tree has multi branches which is characteristic for the species and reasonable morphology.

This large/ medium tree offers an instant impact, all round year interest, is in scale to its surroundings, and adds to the sylvan and character of the surrounding treescape area.

The ivy should be girdle at the base and removed.

A methodology to still rate the tree's worthiness for a TPO, still scores the tree reasonably high.
