Site

The three Lime *Tilia* spp. trees, as marked on the plan T1, T2, T3 and as seen in the photographs, are situated in the rear grounds of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The trees are protected by a Tree Preservation Order (TPO)

Proposal

Tree works proposed.

Works to trees protected by a TPO.

X3 Lime trees: Reduce the Height and Spread by 3-4m in height and 2-3m in width to balance and shape. Raise the height of the lower branches to 3m in order to provide sunlight penetration to the understory and provide clearance.

Issues

I hold no objections to the reasonable, repeat proposed pruning works.

The specification is within good arboricultural practice and husbandry.

The Limes have been managed as pollards in the past. Lime trees generally respond well to such pruning works and restore their crowns in a short period of time.

Recommendation

No Objection
