Site

The Ironwood tree T1, as marked on the plan and shown in the photograph, is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T1 ironwood - reduce from 12m to 9m and reshape

Issues

I hold no objections to the repeat reasonable sensitive and sympathetic pruning works.

The specification is within good arboricultural practice and husbandry.

The tree has been reduced before and the reduction will be back to the most recent previous pruning points.

This will keep the tree in scale to its immediate surroundings whilst still keeping the amenity value, and benefits of the tree.

Recommendation

No Objection
