Dear Sam

Northumberland Development Project Section 73 Application (Ref: HGY/2023/2137): Environmental Statement Addendum Update Note

Introduction

This ES Addendum Update Note has been prepared on behalf of Tottenham Hotspur Property Company Limited ('Applicant') and accompanies amendments to a Section 73 application¹ submitted to the London Borough of Haringey ('LB Haringey') in July 2023 for the proposed amendments to the Plot 3 (Hotel) ('Submitted Scheme') within the Northumberland Park Development Project ('NDP') (Consented Scheme)².

The Consented Scheme was subject to an Environmental Impact Assessment (EIA), with an Environmental Statement (ES) prepared and submitted in 2015 ('2015 ES').

Following this, amendments to the design of Plot 3 (Hotel) were made in 2023, including the massing of the building becoming taller and slenderer, with a slight increase in floorspace for hotel use. An ES Addendum was prepared by Quod and submitted in July 2023 ('July 2023 ES Addendum'). The July 2023 ES Addendum provided further environmental information that appraised the potential environmental effects of the proposed amendments. All topics previously assessed in the 2015 ES were reappraised in the ES Addendum. The residual effects for the Submitted Scheme remained as presented in the 2015 ES for all technical topics, except for limited changes in residual effects for six viewpoints³ and a reduction in significance from moderate adverse to negligible effects for pedestrian comfort wind conditions to pedestrians in the south of the stadium. This reflected implementation of the new landscaping scheme for wind mitigation purposes. No additional mitigation measures were required for the Submitted Scheme to those presented in the 2015 ES.

Since submission of the Section 73 Application, the Applicant has instructed the design team to make a number of design changes to the Submitted Scheme to respond to comments that have been raised

¹ LB Haringey Ref: HGY/2023/2137

² LB Haringey Ref: HGY/2015/3000, as amended

³

during the consultation period from the LB Haringey. A detailed summary of the further amendments (the ‘Amendments’) is provided below.

This ES Addendum Update Note is accompanied by the following Annexes:

- Annex 1: Scoped Out ES Addendum Topics;
- Annex 2: Townscape and Visual Impact Assessment ES Addendum Update;
- Annex 3: Wind Microclimate ES Addendum Update; and
- Annex 4: Daylight, Sunlight and Overshadowing ES Addendum Updated.

This ES Addendum Update Note concludes that the effects presented within the 2015 ES and July 2023 ES Addendum remain valid. It is not considered to constitute ‘further environmental information’ as defined in the EIA Regulations and is provided for informative purposes to LB Haringey.

This ES Addendum Update Note should be read in conjunction with the 2015 ES and July 2023 ES Addendum. The 2015 ES, the July 2023 ES Addendum and this ES Addendum Update Note together form the ES (as amended) for the purposes of decision making.

Submitted Scheme

The Submitted Scheme comprises the following:

“Application under Section 73 of the Town and Country Planning Act for variations to Condition A4 (Consented Drawings and Documents) and Condition A7 (Maximum Quantity/Density) of the hybrid planning permission HGY/2015/3000 (as amended) for the proposed demolition and comprehensive redevelopment of the Northumberland Park Development Project (the amendments consist of revisions to the design, height and maximum floorspace at Plot 3 Hotel and other changes).”

The area schedule for the Submitted Scheme is presented in Table 1. The maximum heights and number of storeys of the Submitted Scheme is presented in Table 2⁴.

Table 1: Submitted Scheme Area Schedule

Land Use	Use Class	Area GIA (sqm)	Units
Leisure (including stadium)	D2	122,000	N/A
Hotel	C1	16,132	180 rooms

⁴ It should be noted that the maximum heights and number of storeys remain unchanged from the Consented Scheme.

Land Use	Use Class	Area GIA (sqm)	Units
Residential	C3	53,298	634
Sui Generis/Tottenham Experience	Sui Generis	4,311	N/A
Business	B1	4,000 (max)	N/A
Community and Culture	D1	6,000 (max)	N/A

Table 2: Submitted Scheme Maximum Heights

Plot	Maximum Height	Maximum No. Storeys
Plot 1	59.15 mAOD	N/A
Plot 2	25.10 mAOD	3
Plot 3	127.20 mAOD	29
Plot 4	62.00 mAOD	7
Plot 5	A – 104.62 mAOD B – 78.22 mAOD C – 131.02 mAOD D – 80.22 mAOD	32
Plot 6	31.8 mAOD	2

Proposed Amendments

In summary, the Amendments comprise the following:

- **A. Top of Tower:** The top of the 'planar blades' have been mirrored and articulated to accentuate the building more as a landmark for the area. This consequentially changes the internal layout and aspect of the units and the façade detail and lighting. The plant rooms have also been relocated and the provision of photovoltaic (PV) panels has been added to the canopy roof. The overall height of the building does not change from the Submitted Scheme (127.20m AOD);
- **B. Balcony Materiality and Planters:** The residential balconies have been amended with a bronze finish to match the 'folding blades' and top of the tower. A dark grey upstand measuring 400mm to the inside of the balustrade to conceal the freestanding planters has been included;
- **C. Facade Materiality and Articulation:** The overall building energy efficiency, U-Value and thermal performance has been refined through the development of the façade. This has been achieved through:
 - The use of solid aluminium panels instead of the curtain wall system;

- The use of glazing only where vision panels are required;
 - The combination of polished, matte and brushed aluminium panels;
 - The provision of solid openable panels within all habitable rooms; and
 - The rationalisation of all wall types by reducing the amount of glazing.
- **D. Residential Amenity Layout:** The Level 13 residential amenity terrace is now directly connected with the vertical core. This means that residents can access the residential amenity terrace without the need to pass through other internal spaces;
 - **E. Hotel and Hotel Amenity Floors:** The number of hotel rooms has been reduced from 20 to 18 rooms per floor (now spanning Levels 02-11). The total number of hotel rooms does not change (180 no. total). The hotel amenity spaces have also been improved through the following design changes:
 - The pool has been rotated 90 degrees to maximise views towards Central London;
 - A mezzanine floor has been added;
 - The line of facade has been extended to increase floor area, and provide a double-height internal space; and
 - Minor adjustments to height of levels with no change to overall height of building.
 - **F. Ground and Podium Facade Interface:** The large grey columns have been omitted and replaced with a continuous light grey pre-cast concrete and glazed plinth to unify podium and ground level. The finish and character of this plinth will match the materials within the Stadium. The entrances have been further articulated as a result. Additional planting is proposed at podium level and on the terrace; and
 - **G. Consolidated Access for Hotel and Amenity:** The hotel and amenity lobbies have been combined to create a grand architectural expression and hierarchy to all entrances at the base of the building. Cycle parking, including visitor cycle parking, is located internally and accessed through a cycle lift.

The Amendments will not change the number of residential units or residential unit mix provided by the Submitted Scheme, nor will the proposed footprint or heights of the Plot be affected. The landscaping strategy has been changed as a result of the Amendments of the entrances. To ensure the wind effects remain negligible, further CFD analysis was undertaken to ensure the additional wind mitigation has been incorporated into the landscaping strategy to ensure there are no safety or comfort exceedances. No changes to the remainder of the Consented Scheme (i.e. Phases 3-6) are proposed.

A summary of the land use amendments from the Consented Scheme and Submitted Scheme is presented in Table 3.

Table 3: Proposed Area Schedule with Changes from Consented Scheme and Submitted Scheme

Land Use	Use Class	Area GIA (sqm)	Units	Change from Consented Scheme	Change from Submitted Scheme
Leisure (including stadium)	D2	122,000	N/A	N/A	N/A
Hotel	C1	16,601	180 rooms	+1,064 sqm	+469 sqm
Residential	C3	53,298	634	N/A	N/A
Sui Generis/ Tottenham Experience	Sui Generis	4,311	N/A	N/A	N/A
Business	B1	4,000 (max)	N/A	N/A	N/A
Community and Culture	D1	6,000 (max)	N/A	N/A	N/A

Approach to the Review

The Amendments have been considered in the context of the EIA and the July 2023 ES Addendum. This review has ascertained whether any new or materially different significant environmental effects are expected as a result of the Amendments and whether any further environmental information needs to be provided in respect of the Amendments, in line with the Town and Country Planning (Environmental Impact Assessment) Regulations 2017⁵ ('EIA Regulations') (as amended)⁶.

The approach to review of assessment of Amendments is as follows:

- Review of baseline conditions, legislation, policy and guidance since the submission of the July 2023 ES Addendum;
- Review of the Amendments to the Submitted Scheme;
- Assessment of whether the environmental effects described in the July 2023 ES Addendum remain valid for decision making in light of the Amendments; and

⁵ HMSO, (2017). The Town and Country Planning (Environmental Impact Assessment) Regulations 2017. The Stationary Office. April 2017.

⁶ HMSO (2018). The Town and Country Planning and Infrastructure Planning (Environmental Impact Assessment) (Amendment) Regulations 2018. The Stationary Office. October 2018

- Review of committed developments considered within the cumulative assessment.

Baseline, Legislation, Policy and Guidance Review

Baseline studies and updates were undertaken in for the July 2023 ES Addendum where required. Since submission of planning application for the Submitted Scheme, there have been no material changes to on-site or off-site conditions at the Site. As such, the baseline studies presented in the July 2023 ES Addendum are considered to remain valid.

A review of relevant legislation, policy and guidance across the topics scoped into the ES Addendum has been undertaken and it is considered that there are no significant changes to legislation or policy that would change the findings of the July 2023 ES Addendum.

On the 5th September 2023, the National Planning Policy Framework⁷ (NPPF) was updated to amend the policy to assist decision makers dealing with proposals to improve existing renewable energy sites giving weight to the advantages of doing so. Another amendment related to wind turbine developments. These changes do not have a bearing on the assessments presented within the July 2023 ES Addendum.

The Levelling Up and Regeneration Act (LURA) received Royal Assent on the 26th October 2023. The LURA includes substantial planning reforms, sets out the framework for the levelling up missions and introduces a range of devolution measures. proposals that would provide ministers with powers to significantly change environmental law through secondary legislation amending or replacing the existing Environmental Impact Assessment (EIA). However, it should be noted that updates to secondary legislation need to come into force to have material implications on the EIA process. As such, the LURA does not have a material bearing on the EIA process undertaken for NDP.

Review of Assessment Findings

Within the July 2023 ES Addendum, statements of conformity (SoC) were provided for the following technical topics:

- Air Quality;
- Archaeology
- Cultural Heritage;
- Ecology;
- Water and Flood;
- Ground and Hydrogeology;

⁷ National Planning Policy Framework (2023).

- Noise and Vibration;
- Socio-economics;
- Transport; and
- Electronic Interference.

Annex 1 provides the reasoning for why further consideration of the remaining environmental topics covered the ES (as amended) was not considered necessary.

The Amendments would not change the conclusions of the July 2023 ES Addendum pertaining to the above technical topics.

Cumulative Scheme Review

A review of planning applications submitted and approved since July 2023 has been undertaken to establish if additional cumulative schemes have come forward since submission of the Section 73 application, or if the status of the existing cumulative schemes have changed. Following a data search of the LB Haringey planning portal using the search criteria identified in Chapter 2: EIA Regulatory Framework of the July 2023 ES Addendum, no additional schemes have been identified. The cumulative scheme list remains as presented in the July 2023 ES Addendum.

Summary of Updated Assessment Findings

Further consideration has been given to relevant topics that were assessed in the ES Addendum including townscape and visual, wind microclimate and daylight, sunlight and overshadowing. Additional assessments have been undertaken by technical consultants and are provided in Annexes 2 – 4 of this ES Addendum Update. A Summary of these assessments are provided below.

Townscape and Visual Impact Assessment

The Amendments have been tested by analysing 15 selected AVRs, taken from the surrounding area, including the North Tottenham Conservation Area, Tottenham Cemetery and Bruce Castle Park. The updated views were prepared as accurate visual representations by visualisation specialists Miller Hare, based on the architects' accurate model of the revised scheme.

As illustrated in the comparative AVRs presented in Annex 2, the Amended Scheme would continue to be a significant enhancement to the nearby townscape character areas and in townscape views. It would remain a piece of architectural design of very high calibre with the potential to revitalise this part of Haringey.

The Amendments to the Submitted Scheme do not alter the findings of the cumulative assessment and there are no new cumulative schemes identified. Therefore, the July 2023 ES Addendum remains valid with regard to cumulative effects.

Overall, the Amendments to the Submitted Scheme do not alter the findings of the assessment presented in the July 2023 ES Addendum.

Wind Microclimate

An updated wind microclimate assessment was undertaken using computational fluid dynamic (CFD) modelling, with directional contours of wind speed ratio typically examined between the Submitted Scheme and the Amended Scheme. This facilitates a general quantitative overview of the similarity of wind patterns in each area of interest.

The Amendments are generally minor, with the real change of note confined to the uppermost levels. Overall the scale, massing, orientation, exposure is unchanged between the Submitted Scheme and Amended Scheme, and the architecture is substantially similar. As a result, changes to the wind microclimate would be expected to be substantially confined to the regions where these changes take place which comprise the street level entrances and public plaza, podium terrace, Level 13 amenity level and Levels 27 – 29.

The relevant resulting effects are as follows for each location:

- Street- level southern entrances and public plaza – suitable for planned uses, there will be a negligible residual effect in this area;
- Podium terrace (northwest) – the podium will be suitable for access and passage through the terrace. The area of seating by the northern façade will be suitable for long-term sitting during summer and autumn, and thus a negligible residual effect in this area. Elsewhere, conditions are expected to meet the threshold wind speed for long-term sitting 80-90% of the time, depending on location – where so, this represents a moderate adverse residual effect;
- Level 13 amenity level –conditions are still expected to be suitable for short-term sitting from spring to autumn, and thus suitable for a general amenity space, where so this represents a negligible residual effect. With this terrace now showing tables and chairs throughout a majority of the area, and with the re-arranged orientation of the pool, associated rotation of the column of sun loungers and the likely removal of the wind break, conditions suitable for short-term standing / sitting from spring to autumn represent a moderate adverse residual effect; and
- Levels 27, 28 and 29 – broadly suitable for short-term standing / sitting from spring to autumn (negligible residual effect), still with the exception of part of the northernmost terrace where conditions spill into the strolling category (moderate adverse effect).

Overall, the Amendments to the Submitted Scheme do not alter the findings of the assessment presented in the July 2023 ES Addendum.

The Amendments to the Submitted Scheme do not alter the findings of the cumulative assessment and there are no new cumulative schemes identified. Therefore, the July 2023 ES Addendum remains valid with regard to cumulative effects.

Daylight, Sunlight and Overshadowing

Given the Amendments relate to the massing, updated technical daylight and sunlight assessments have been undertaken by re-running of computer modelling to assess the daylight, sunlight, overshadowing and solar glare effects.

As a result of the Amendments, two additional windows serving bedrooms at 11 and 22 Concord House would see alterations greater than 2% Vertical Sky Component (VSC), compared to the Submitted Scheme. The alteration to these two windows is 2.1% and therefore only marginally above the criteria where alterations in accessible daylight is significant. Given that these two windows serve secondary rooms (bedrooms), with the main living spaces facing away from the Site, these alterations are not considered significant.

There would be no change to the sunlight assessments and the daylight / sunlight conclusions presented in the July 2023 ES Addendum remain valid.

Due to the minimal nature of massing changes, no update to the technical assessments is considered necessary. Whilst the shape and extent of shadows may marginally alter, the overall conclusions would be unchanged, with each of the area remaining well sunlit,

Therefore, the overshadowing conclusions presented in the July 2023 ES Addendum remain valid.

The Amendments to the top of the building would not be visible from the majority of viewpoints, or only at a great distance. The Amendments at the lower floors may be visible, however, glazing ratio remains very similar to the Submitted Scheme. Therefore, no update to technical assessments is considered necessary.

Therefore, the overshadowing conclusions presented in the July 2023 ES Addendum remain valid.

The Amendments to the Submitted Scheme do not alter the findings of the cumulative assessment and there are no new cumulative schemes identified. Therefore, the July 2023 ES Addendum remains valid with regard to cumulative effects.

Overall, the Amendments to the Submitted Scheme do not alter the findings of the assessment presented in the July 2023 ES Addendum.

Conclusions

The Amendments to the Submitted Scheme have been appraised for relevant technical topics. The Amendments are not considered to be substantive and updated assessments have concluded that the July 2023 ES Addendum remains valid for decision making and no further environmental information is required.

Yours sincerely

Aisling Webb
Director

Annex 1: Scoped Out ES Addendum Topics

Quod | 21 Soho Square London W1D 3QP | 020 3597 1000 | quod.com

Quod Limited. Registered England at above No. 7170188

Topic	Rationale
Archaeology, Ground Conditions and Hydrogeology , Water Resources and Flood Risk and Ecology	There is no material change in the building footprint covered by the Development to that assessed through the Submitted Scheme. There is no material change in the overarching drainage strategy of the Submitted Scheme. There is no material change in the overarching landscape strategy of the Submitted Scheme, with the exception of minor amendments to the play strategy. The Amendments would not change the conclusions of the July 2023 ES Addendum. Therefore, the conclusions stated in the ES (as amended) remains valid and no further assessment is provided in this ES Addendum Update Note.
Cultural Heritage	While the Amendments relate to massing of the Submitted Scheme, the potential beneficial effects that were identified in the 2015 ES for Plot 3 (the Hotel) are still anticipated, along with minor beneficial effects also identified on the setting of the Grade II* and Grade II listed buildings on Northern Terrace. Therefore, the conclusions stated in the ES (as amended) remains valid and no further assessment is provided in this ES Addendum Update Note.
Socio-economics	The Amendments relate generally to massing of the Submitted Scheme. The Amendments do not alter the unit/tenure mix or the playspace strategy of the Submitted Scheme. Therefore, the conclusions stated in the ES (as amended) remains valid and no further assessment is provided in this ES Addendum Update Note.
Transport, Air Quality and Noise and Vibration	There are no proposed changes to the maximum quantum of floorspace, type or mix of land uses; therefore, there will be no change in the traffic flows generated by the Amendments. Proposed vehicle routing remains as previously assessed. The PTAL rating is as presented in the July 2023 ES Addendum. The Amendments would not change the conclusions of the ES (as amended). Therefore, the conclusions stated in the ES (as amended) remains valid and no further assessment is provided in this ES Addendum Update Note.
Electronic Interference	The implemented mitigation strategy associated with the Consented Scheme was completed after granting of the 2016 permission for any potentially affected properties at the time and the majority of residential properties in the local area are now expected to utilise streaming based services. The Amendments do not change this and therefore, the ES (as amended) remains valid and no further assessment is provided in this ES Addendum Update Note.

TOWNSCAPE AND VISUAL IMPACT ASSESSMENT ES ADDENDUM UPDATE

CONTENTS

1.0 Introduction and the Revised Development 1

2.0 Revised Townscape and Visual Assessment 3

3.0 Conclusion..... 4

Appendix I – Updated AVRs 5

Important Note: Images in this document have fine detail and high resolution photographs and are always printed by Citydesigner to the highest standards. Original copies are identified by Citydesigner's dichroic hologram. Original printed copies may be available to view at the relevant Local Planning Authority offices. Photocopies or low resolution printouts should not be relied upon.

The reader can identify whether they have a top-quality digital version of the report by the size of the high quality pdf which is 94.4 MB. If the reader is only able to download low resolution split sections of the report from the local planning authority's planning portal, a combined high resolution pdf of the document can be provided upon request.

This page is intentionally left blank

1.0 INTRODUCTION

1.1 Citydesigner ('the consultancy') has been commissioned by Tottenham Hotspur Property Company Limited ('the Applicant') to advise on and prepare a full Townscape and Visual Impact Assessment ('TVIA') report for the Northumberland Development Project Hotel Section 73 application to amend the hybrid consent granted on 15 April 2016 ('Operative Permission'). The application relates to design amendments to the approved hotel scheme at Plot 3. The consultancy prepared a Townscape and Visual Impact Assessment ('TVIA') report to support the S73 application; this formed Chapter 12 of the Addendum Volume I of the Environmental Statement (Addendum TVIA) which was submitted to LB Haringey in August 2023.

1.2 In response to post-submission discussions with LB Haringey planning officers and the Quality Review Panel (QRP), minor design revisions are proposed to the August 2023 submitted scheme. They are listed in paragraphs 1.3 to 1.5 below. This is a TVIA ES Addendum Update report which considers the proposed design revisions and whether these revisions would change any of the residual and cumulative effect significance ratings in the submitted August 2023 Addendum TVIA.

Proposed Amendments

1.3 The proposed amendments are set out in the Design and Access Statement (DAS) Addendum Update. Please refer to this document for detailed descriptions and illustrations of the proposed revisions.

1.4 Of the proposed revisions, the key change is that the north-facing tallest point of the angled profile of the revised Development will be inverted to face south and the planar 'blade' heights have been revised (within the maximum parameters).

1.5 The other proposed amendments relevant to the TVIA are:

- Design development and change of materiality to top of tower 'lantern' facing south
- Projecting fins at the top of the 'blades' are further articulated with increased depth and density
- Change of material to the 'planar blade' façades from opaque/fritted glass to anodised-effect aluminium panels
- Balcony balustrades have been changed from a dark grey colour to light bronze to match the projecting mullions and fins, and a detail for planters (by residents) has been included

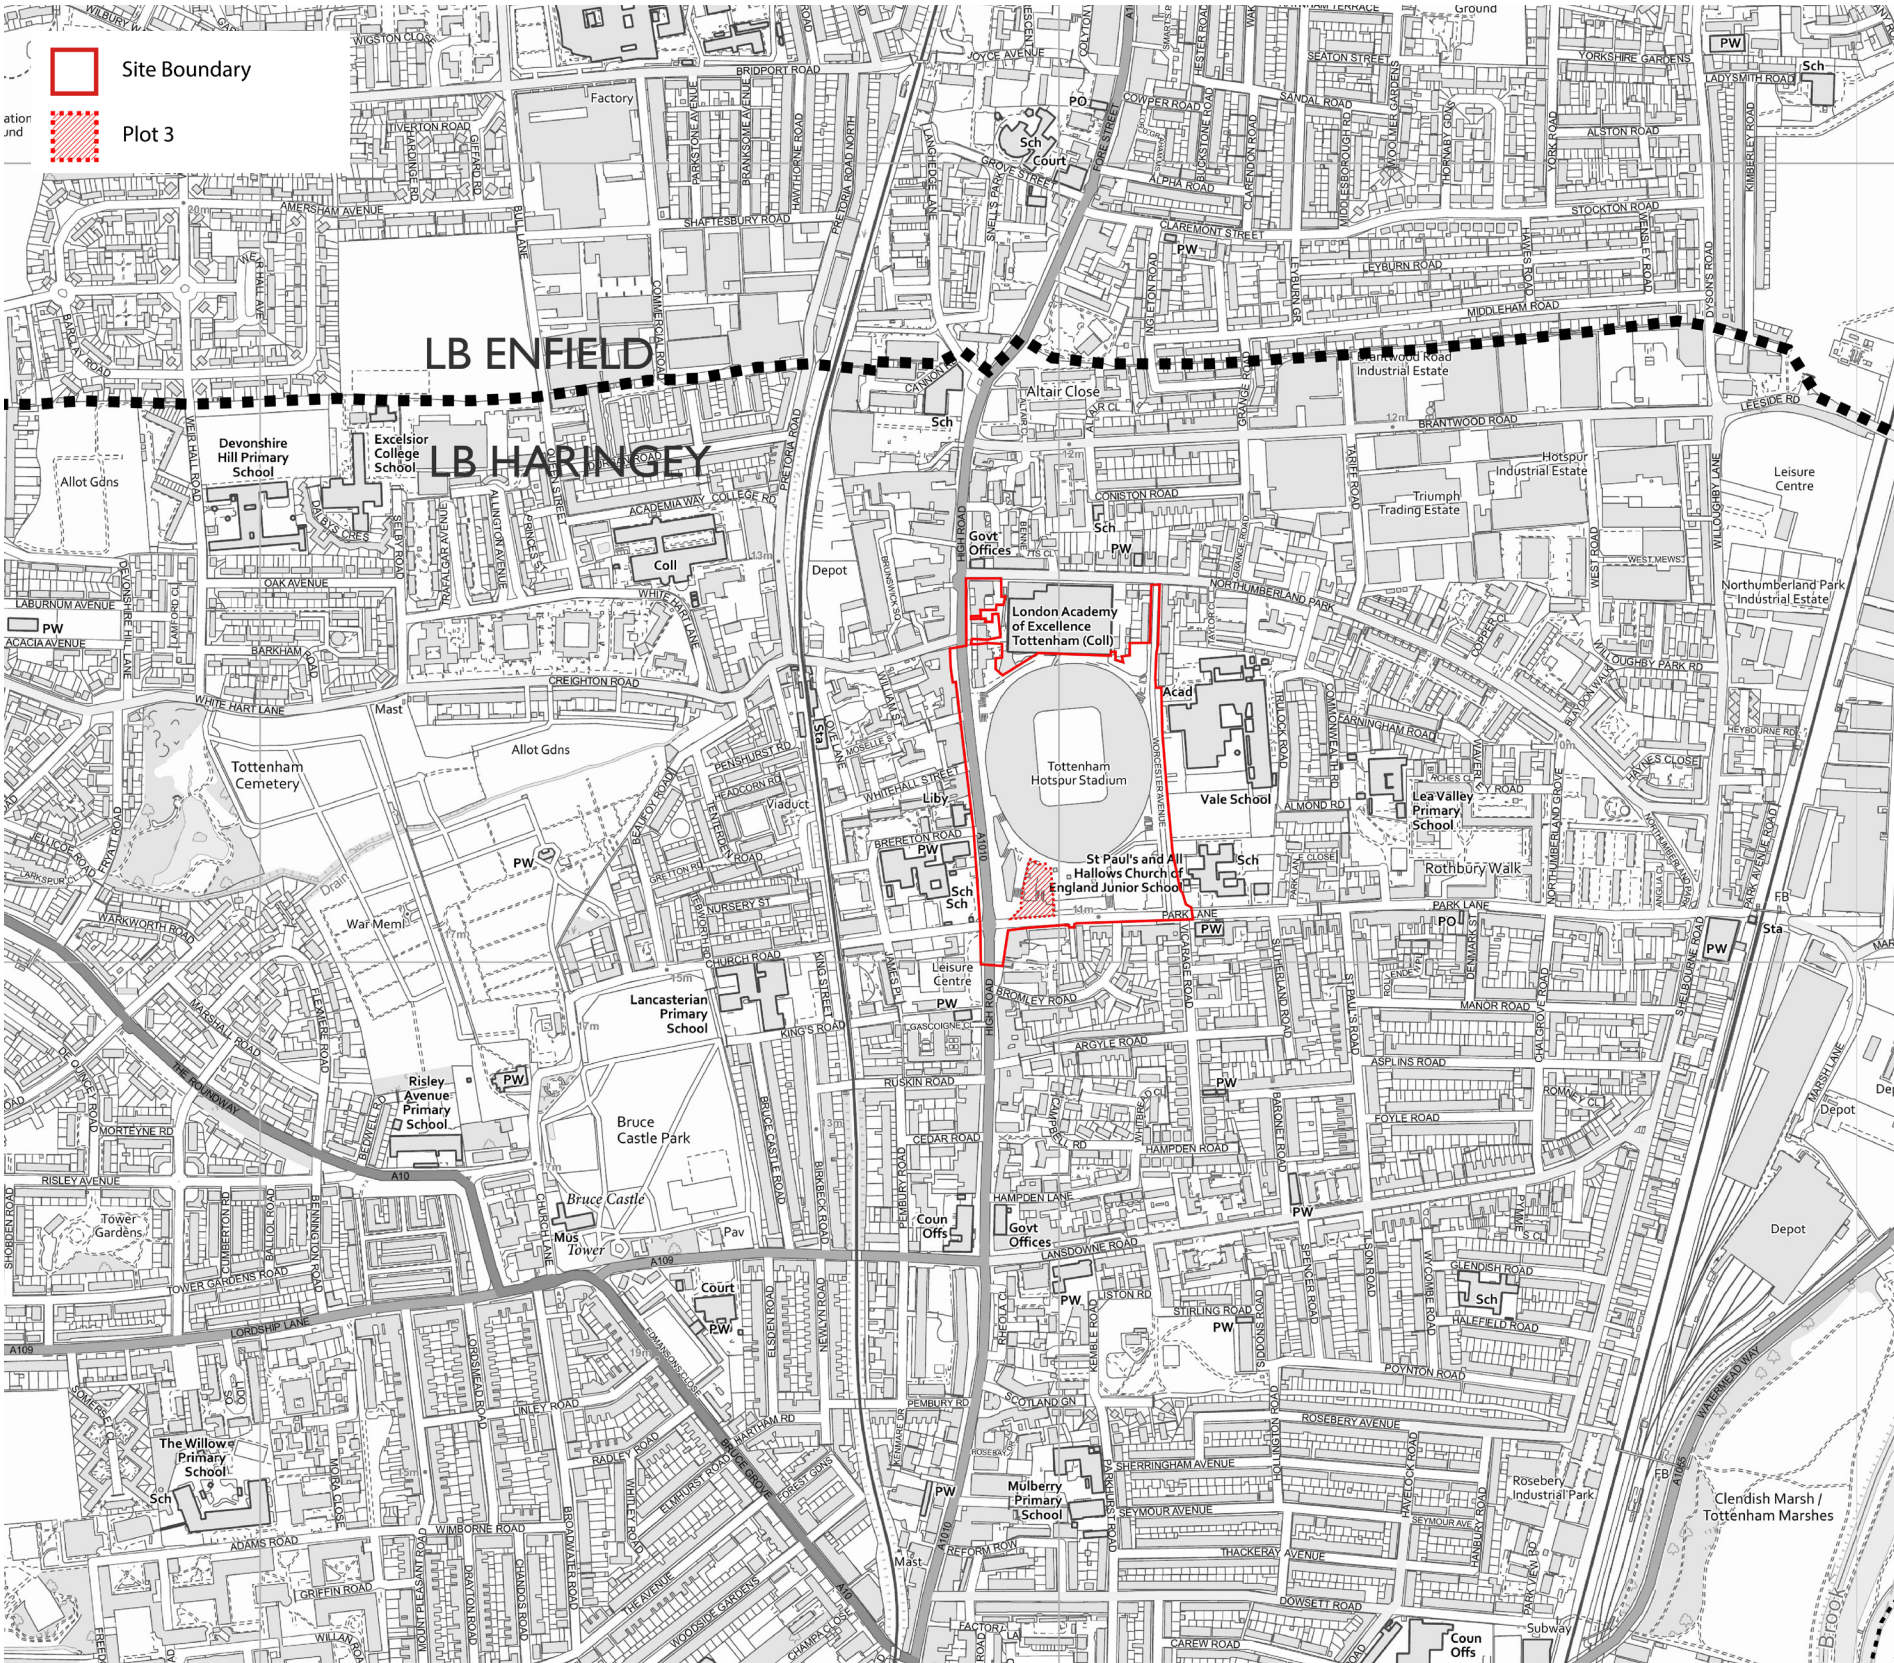

Fig. I.1: 2021 Ordnance Survey map showing the Site, outlined in red. The Plot 3 is hatched in red.

2.0 METHODOLOGY (CONTD.)

- Refinements to the entrances, with columns expressed and colonnade created, to improve visual permeability and the transition between external and internal spaces
- Changes to material, texture and colour of the building’s base to improve legibility and relationship with the upper parts

Methodology

- 1.6 The methodology for the assessment of likely revised effects of the Development on townscape character and visual amenity is presented in chapter 2 of the August 2023 Addendum TVIA. This approach remains valid and is used in this TVIA ES Addendum Update report to assess whether the proposed design revisions would alter the August 2023 findings of the potential effects of the Development.

Cumulative Schemes

- 1.7 In addition to an assessment of the townscape and visual effects of the Development in isolation, the August 2023 Addendum TVIA also considered the effects of the Development when assessed in combination with other cumulative developments. The cumulative schemes relevant to the townscape and visual assessments remain the same as presented in the August 2023 Addendum TVIA.

2.0 REVISED TOWNSCAPE AND VISUAL ASSESSMENT

2.1 This chapter considers the effects of the proposed design revisions to the August 2023 scheme on townscape receptors and selected townscape views. Of the set of 29 view positions assessed in the August 2023 Addendum TVIA, the consultancy has chosen a representative set of 15 Accurate Visual Representations (AVRs) to illustrate the effects of the design revisions.

2.2 Visualisation specialists Miller Hare have modelled the revised scheme for the above selection of views; the updated views are appended showing the August 2023 proposed view alongside the revised proposed view for easy comparison. The selected views are highlighted in yellow in the map at figure A1.1 in Appendix 1.

Effects of the Design Amendments to the Development

2.3 The effects of the design amendments described and illustrated in the DAS Addendum Update, and listed at paragraphs 1.3 and 1.4 of this document are considered below:

- Changes to the design of the top of the building and the 'lantern' to the south, and minor refinements to 'planar blade' height: The change to the top of the building is one of orientation, with the higher part now facing south. It is a logical amendment prompted by feedback from Haringey planning officers and the QRP, tested by the architects, and agreed by the wider design team, to represent an enhancement to the design.
- Projecting fins at the top of the 'blades' are further articulated with increased depth and density: This is a subtle but welcome refinement that will add further depth and texture to the façade.
- Materiality of 'planar blade' façades changed from opaque/fritted glass to anodised effect aluminium panels: The façade will be composed of a range of matte to polished panels in order to achieve a reflective 'lightness' to the façade.
- Balcony balustrades have been changed from a dark grey colour to light bronze to match the projecting mullions and fins, and a detail for planters has been provided to encourage residents to 'green' their part of the south elevation: These revisions, in response to comments from the QRP, will create a 'softer' architectural expression to the south façade.
- Refinements to the entrances, with columns expressed and the introduction of a colonnade: These design refinements, along with the proposed improvements to the public realm, will make the connection between external and internal spaces more fluent and the visual continuation of the canopy is improved.
- Changes to material, texture and colour of the building's base: These design revisions were made to improve the legibility of the building when experienced in closer views and from key transport nodes. The materiality

was refined to give it a contrasting relationship with the upper parts of the tower, and also relate it to the TH Stadium cladding at ground and podium levels.

2.4 The consultancy believes that further design development and continued dialogue with officers has led to designs of greater refinement and clarity of expression. Effectively, this increases the level of quality in design terms and consolidates the findings of beneficial effects in the August 2023 TVIA. Since there is no increase in massing, the turning of the top section by 180° and minor revisions to the detailing and materiality of the Development, will not result in any material changes to the townscape and visual effects as set out in the August 2023 Addendum TVIA.

2.5 **Effects on Townscape Receptors:** The revisions to the building (as set out in paragraph 1.5, and in the DAS Addendum update) would improve legibility, visual permeability and the relationship of the base to the upper parts of the tower. These minor refinements would not alter the effects of the scheme on the three townscape character areas as assessed in the August 2023 Addendum TVIA. The findings set out in section 6 and Table 8.2, section 8 of the August 2023 Addendum TVIA remain unchanged and valid.

2.6 **Effects on Visual Receptors:** The proposed design revisions are subtle improvements that do not significantly alter the overall visual effect of the scheme. As can be seen when comparing the AVRs of the August 2023 scheme and proposed revised scheme, presented in Appendix 1, the inversion of the top gesture of the building is a subtle change with no increase in overall height and one which maintains its landmark role in the townscape and in views. The revisions to the 'lantern' at the top, added texture of the projecting fins, and revisions to materiality, are refinements that add to the architectural quality of the design. There is considered to be no material change to the visual effects; the assessments set out in section 7 and Table 8.3 of the 2023 August Addendum TVIA remain unchanged and valid.

3.0 CONCLUSION

- 3.1
- This document, titled TVIA ES Addendum Update, is an update to Chapter 12 of the Volume I of the Environmental Statement (ES) Addendum submitted in August 2023.
- 3.2
- The proposed amendments to the Development have been tested by analysing 15 selected AVRs, taken from the surrounding area, including the North Tottenham Conservation Area, Tottenham Cemetery and Bruce Castle Park. The updated views were prepared as AVRs by visualisation specialists Miller Hare, based on the architects’ accurate model of the revised scheme.
- 3.3
- As illustrated in the comparative AVRs in Appendix 1, the revised Development would continue to be a significant enhancement to the nearby townscape character areas and in townscape views. It would remain a piece of very high calibre architectural design with the potential to revitalise this part of Haringey. There would be no changes to the consultancy’s assessments and conclusions set out in section 8 of the August 2023 Addendum TVIA.

APPENDIX I - UPDATED AVRS

A1.1 A selection of the 15 AVRs (8 wirelines and 7 renders) included in the August 2023 TVIA have been updated by visualisation specialists, Miller Hare, based on the architects’ accurate model of the revised scheme.

A1.2 The updated AVRs are listed below and have been highlighted in yellow on the map at figure A1.1.

- View 2:** High Road near Brook House Primary School
- View 3:** High Road at Northumberland Park
- View 4:** William Street
- View 5:** Brereton Road
- View 7:** Church Road
- View 9:** Tottenham Cemetery
- View 10:** Tottenham Cemetery
- View 11:** Tottenham Cemetery
- View 12:** Bruce Castle Park
- View 14:** Bruce Grove looking towards Edmansons Close
- View 17:** High Road south of Lordship Lane
- View 20:** High Road at Cedar Road
- View 22:** High Road at Bromley Road
- View 23:** Park Lane at Denmark Street
- View 25:** 17 Bromley Road

A1.3 The proposed AVR for the revised design is placed alongside the AVR of the August 2023 scheme to enable the reader to make a direct comparison between the two iterations. The full assessments for this selection of views can be found in section 7 of the August 2023 Addendum TVIA; the proposed revisions do not materially alter these assessments.

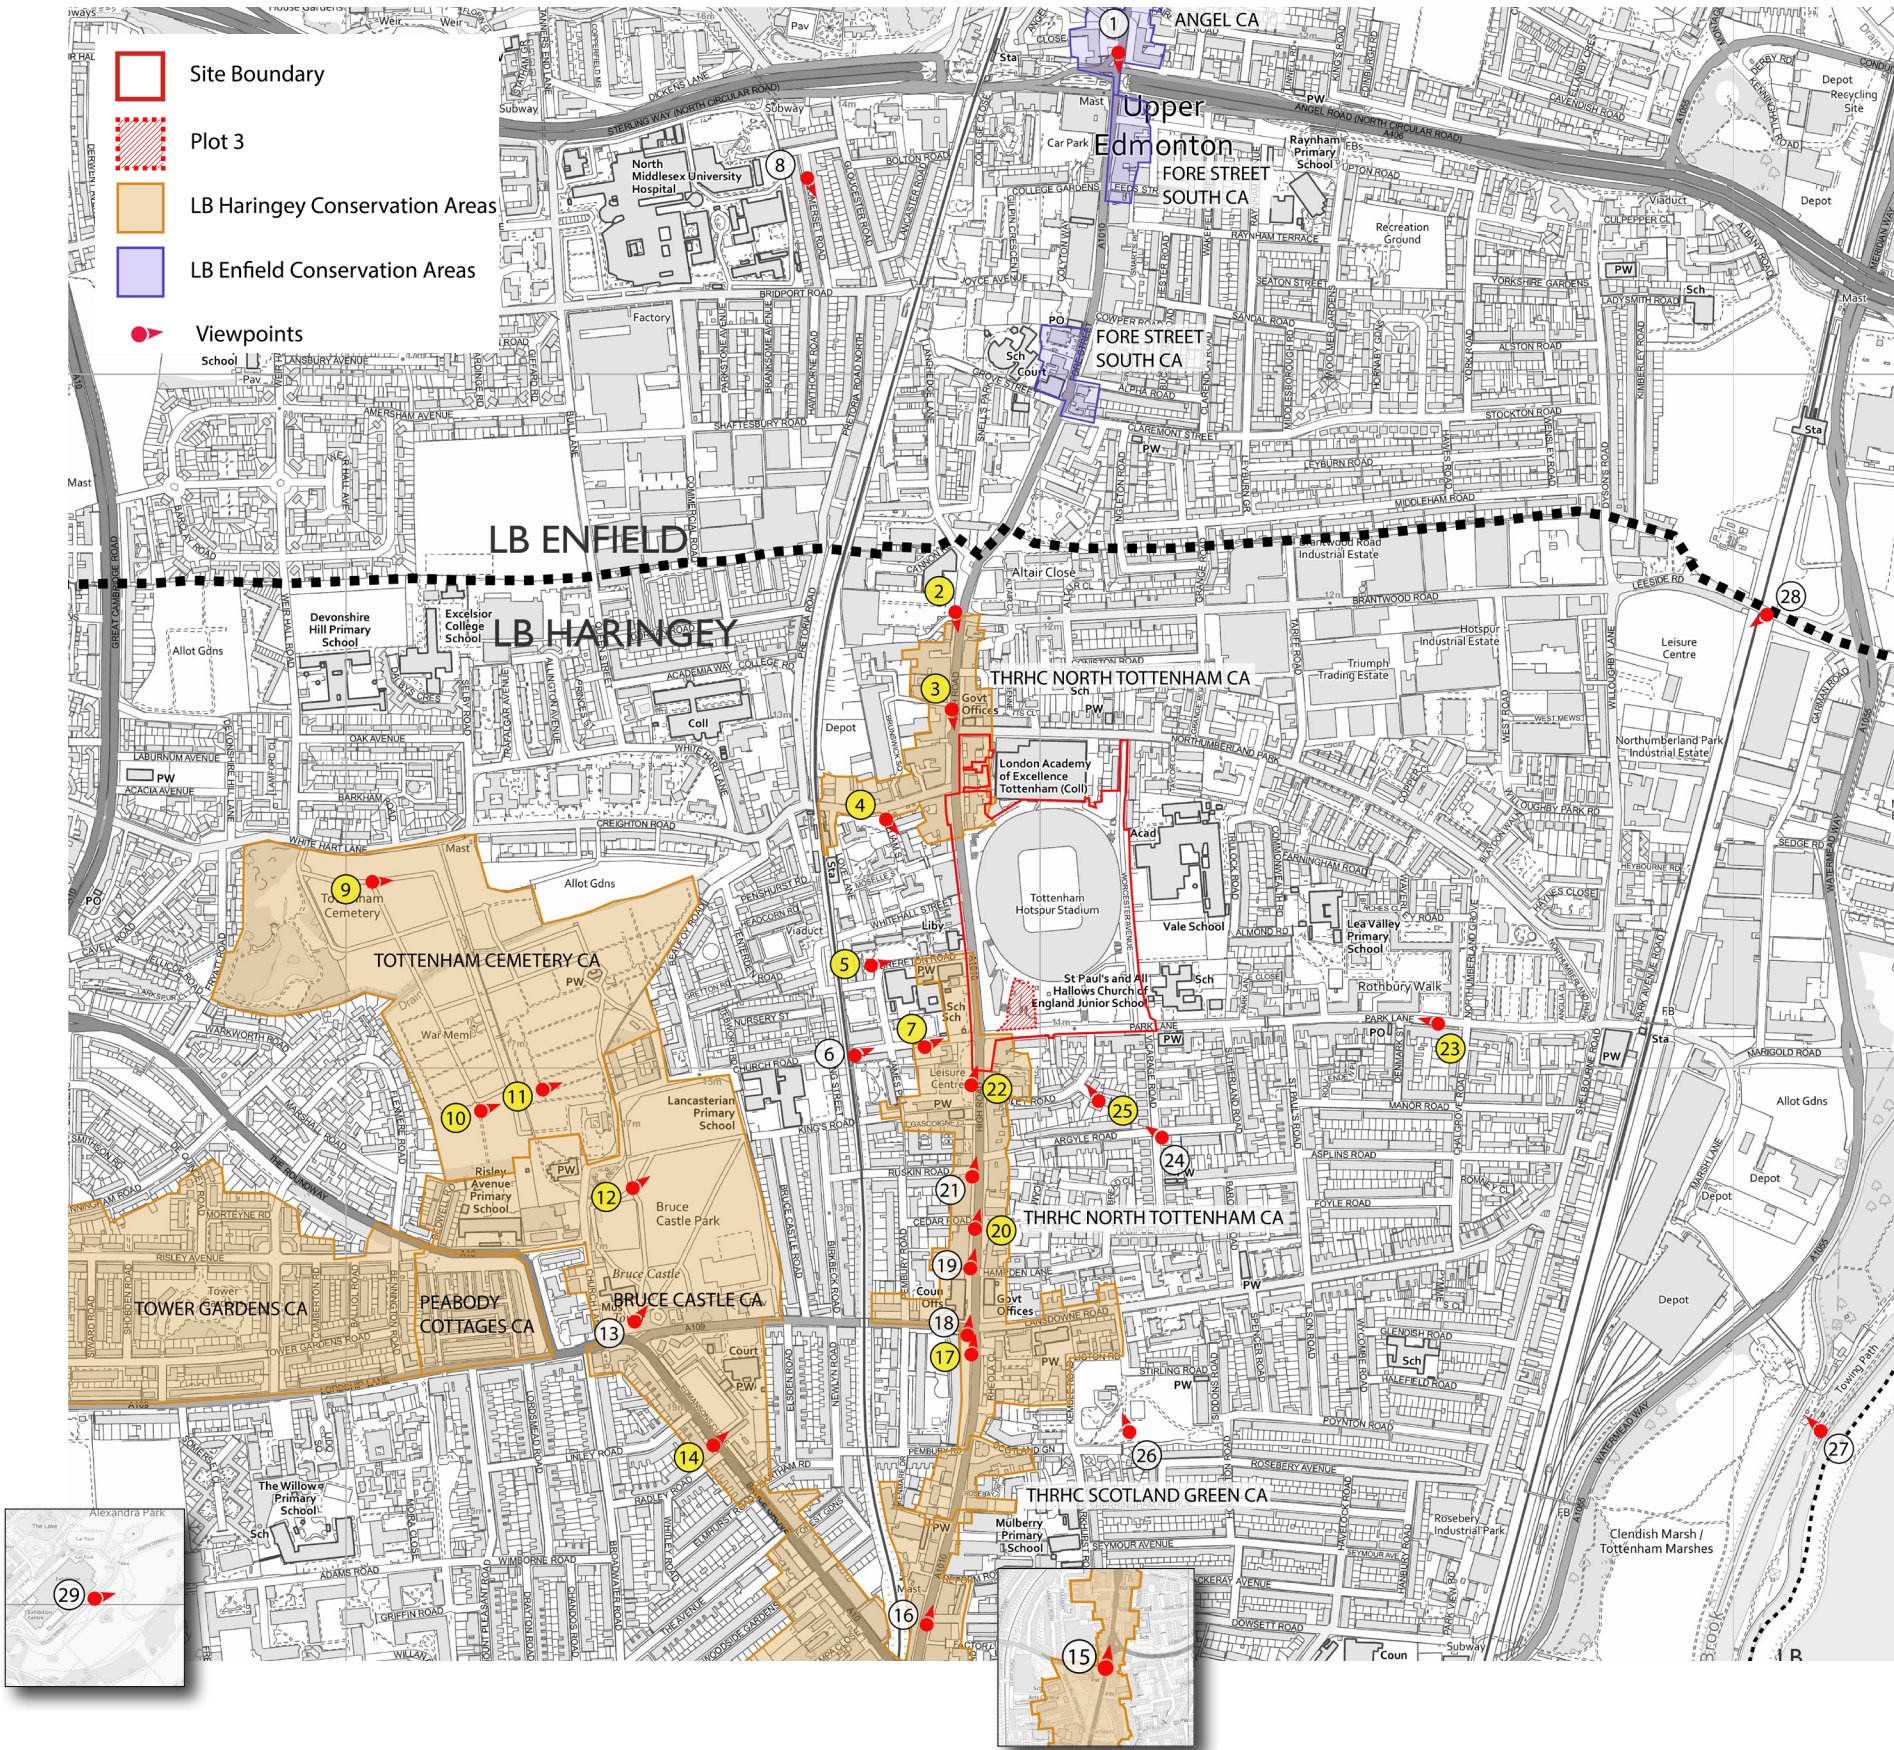

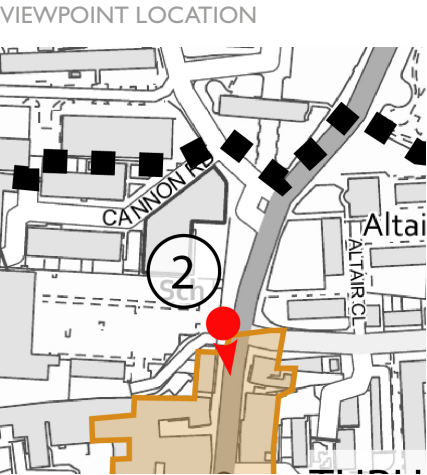

Fig.A1.1: Map showing the 29 selected viewpoints included in the August 2023 TVIA in relation to the Site (outlined in red). The 15 viewpoints included in this Appendix, showing the comparative AVRs, are marked in yellow.

Annex 3: Wind Microclimate ES Addendum Update

Quod | 21 Soho Square London W1D 3QP | 020 3597 1000 | quod.com

Quod Limited. Registered England at above No. 7170188

Northumberland Development Project – Section 73 Application Wind Microclimate ES Addendum Update

This ES Addendum Supplementary Note has been prepared in relation to the various design updates to the Northumberland Development Project (NDP) Section 73 Application (Ref. HGY/2023/213). The Section 73 Application was submitted in July 2023, with a wind microclimate assessment presented in Chapter 16 of an ES Addendum submitted in July 2023 (July 2023 ES Addendum). To predict the wind microclimate associated with the Development, wind tunnel testing was undertaken in July 2023. Since submission of the July 2023 ES Addendum, further amendments to the design have been made which has changed the massing of Plot 3 (Hotel). Further analysis has been undertaken to determine if the conclusions of the July 2023 ES Addendum remain valid for decision making.

Design Updates

The design updates of relevance to the resulting wind microclimate (as described by F3 Architects) are as follows:

- Street level southern entrances & public plaza: pre-cast coloured panels omitted; columns expressed, and colonnade created.
- Podium terrace: design of solid glazed terrace screening, as opposed to perforated 50% solid screen.
- Level 13 amenity level: increase to gross internal area, reducing the size of the external pool terrace, thus removing the inset portion of the terrace.
- Top of tower: top of blades inverted, blade heights updated (within maximum parameters), projected fins added, design development to top of tower 'lantern' to south.

Illustrations of the proposed development prior to, and following, these design updates are presented in Figures 1(a) to 1(d) herein.

Appraisal Methodology

For a structure of this scale, with the propensity for significant gust-related effects and interactions between complex buildings of significant scale, it is highly likely for wind tunnel testing to be required, and to be the major assessment tool of choice. This has been the case for the Development, with predictions of conditions associated with pedestrian and occupant comfort and safety derived substantially via wind tunnel testing.

In October 2023, ArcAero were notified of a number of relatively minor design updates, and we have subsequently carried out an expert review of the effect of the changes, to confirm the validity of the wind tunnel results for the assessment of the proposed development.

To support this, computational modelling (CFD) has been carried out, with directional contours of wind speed ratio typically examined between the Submitted Scheme and Amended Scheme. This facilitates a general quantitative overview of the similarity of wind patterns in each area of interest. These directional contours are presented as follows:

- in Figures 2 for the Street Level Southern Entrances
- in Figures 3 for the Podium
- in Figures 4 for the Southern Terrace, Level 13

A comparative exercise of this nature was less suitable for the private terraces on Levels 27, 28 and 29, where more considerable change has been made, where both the 'blades' and stepped private terraces have been inverted, originally stepping downwards in height from south to north, now stepping upwards in height from south the north, along the extent of the upper western façade. Instead, therefore, CFD has been employed directly, taking care to ensure that adequate agreement is achieved with the wind tunnel results. Contour plots showing summertime comfort for Levels 27 to 29 are presented in Figures 5.

Impact of Changes

Changes of the nature examined herein are typically minor, with the real change of note confined to the uppermost levels. Overall the scale, massing, orientation, exposure is unchanged between the Submitted Scheme and Amended Scheme, and the architecture is substantially similar. As a result, changes to the wind microclimate would be expected to be substantially confined to the regions where these changes take place, specifically:

- Street level southern entrances & public plaza – the opening up of the street level in this area would allow wind to permeate more easily into the space. It was already relatively open in the Submitted Scheme but equally, well sheltered with worst-seasonal conditions that were easily comfortable for short-term standing / sitting associated with entrance use and waiting areas. Modest increases in air movement would not materially alter the suitability of this space;
- Podium terrace (northwest) – the main alteration to this area is the solidification of what was a perforated screen around the perimeter of the terrace. In principle this would offer an improvement to areas in the immediate vicinity of the screen, but with a considerable component of wind within the terrace blowing over this screen, impacting the building and being deflected down and through the space, the practical improvement in wind conditions would be limited. Also, the impermeable nature of the screen would possibly lessen the ability of the wind to easily escape the terrace, resulting in some marginal increases in windiness in places for particular wind directions. On balance, while some difference will occur, the suitability for recreational uses would be the same;
- Level 13 amenity level – the primary drivers of wind through this terrace are southerly winds impacting the south facing façade before being blown around the exposed south-western corner and escaping the terrace, and westerly winds impacting the west facing façade, blowing through the terrace and accelerating around the same corner. These effects will not be substantially altered by the removing the inset portion of the terrace, though the most obvious difference would be the absence of the calmest part of the space, which wind tunnel testing indicated would be suitable for long-term sitting year-round. As with other areas examined, modest differences would occur in parts of this terrace for particular wind directions, but these are unlikely to change the resulting suitability; and

- Levels 27, 28 and 29 – with the revised terrace arrangement, the overall summertime suitability predicted for the Amended Scheme is shown in Figures 5 along with the Submitted Scheme equivalent. Conditions are similar, generally suitable for short-term standing / sitting (as was captured in the wind tunnel and CFD for the Submitted Scheme).

Level of Effect

Given the similarity of conditions expected, the level of effect in each of these areas would be anticipated to be unchanged. However, it is also understood that beyond the primary architectural changes considered thus far, some revisions to mitigation are being considered, as follows:

1. Planter removed from north-western corner of podium terrace: it is understood that while this was present within the wind microclimate report submissions, it was absent from the s73 planning drawings and is unlikely to be returned, given the impact on available space for tables and chairs.
2. Possible omission of the wind break on the Level 13 amenity terrace: were it introduced, this would be a flexible, moveable device.

Accounting for all changes therefore, the relevant resulting effects are judged to be as follows:

- Street level southern entrances and public plaza – suitable for planned uses, there will be a negligible residual effect in this area;
- Podium terrace (northwest) – the podium will be suitable for access and passage through the terrace. The area of seating by the northern façade will be suitable for long-term sitting during summer and autumn, and thus a negligible residual effect in this area. Elsewhere, conditions are expected to meet the threshold wind speed for long-term sitting 80-90% of the time, depending on location – where so, this represents a moderate adverse residual effect;
- Level 13 amenity level – conditions are still expected to be suitable for short-term sitting from spring to autumn, and thus suitable for a general amenity space, where so this represents a negligible residual effect. With this terrace now showing tables and chairs throughout a majority of the area, and with the re-arranged orientation of the pool, associated rotation of the column of sun loungers and the likely removal of the wind break, conditions suitable for short-term standing / sitting from spring to autumn represent a moderate adverse residual effect; and
- Levels 27, 28 and 29 – broadly suitable for short-term standing / sitting from spring to autumn (negligible residual effect), still with the exception of part of the northernmost terrace where conditions spill into the strolling category (moderate adverse effect).

Yours Sincerely,

Dr Robin Stanfield

Director

Architectural Aerodynamics
